ADVERTISE IN THE VICTORIA DAILY TIMES

CHIROPRACTORS GAIN IN BATTLE

(Continued from Page 1)

In support of the bill it was argued the science of chiropractic had made great strides in the last few years. Chiropractic had been practised for twenty years and people still demanded their services. Criticism of their educational standards were hotly resented.

DOCTOR'S VIEW

Dr. Morris, Conservative, Nelson, said he had no quarrel with chiropractors, he was only interested in the public welfare. He advanced arguments along the lines of what members of the Legislature on the importance of diagnosis which chiropractors claimed was unnecessary. The responsibility for such legislation would rest upon the shoulders of members of the House if it was passed.

NO INQUIRY ON MERITS

"We should not deal lightly with a matter affecting the lives of the community," said Mr. Manson in opposing the bill.

He repeated criticism advanced earlier in the session against the limited scope of the Murphy Commission on chiropractors and drugs bills. The report of the commission forced the commissioners to recognise the practice of chiropractors in the province and precluded him from an examination of the efficacy of chiropractors or its relative merits as compared with the practice of medicine.

Declaring people of the United States were inclined to accept fads more readily than Canadians who prided themselves on their conservatism, Mr. Manson voted all the colleges for chiropractors mentioned in the Murphy report except one was in the United States. Views of medical men who spent years of study at recognized Canadian colleges and chiropractors who attended these United States colleges were diametrically opposed on the cause of disease and methods of treatment.

ON ALTAR OF POLITICS

"Are members of this House prepared to give legal recognition to a cult that does not believe in diagnosis? Would they do that because of votes? asked Mr. Manson. "If they do, they are placing the lives of their children on the altar of politics."

Mr. Manson saw another danger in the possible spread of contagious disease through a man unskilled in diagnosis failing to detect it when called in to treat a patient. While it could be argued that liberty was refused by the medical profession to chiropractors, liberty, said the speaker, could become license when it endangered the welfare of the community. Another danger he detected was that chiropractors, who themselves had not passed examinations, would conduct the examination of others. Grave doubts were also raised as to whether the proposed examinations offered protection to the public.

Mr. Manson and his colleagues refused to sit for examinations called for by legislation now on the statute books, they should not be listened to now, said Mr. Manson, after pointing out training for medical men had been increased to six and seven years.

THOUSANDS WANT THEM

George S. Pearson, Liberal, Nanaimo, supported the measure on the ground that thousands of people were convinced chiropractors had a place in healing, but voted the hope the chiropractic board it was proposed to set up would regulate the profession so its members would not attempt to treat disease without proper qualifications. Lack of organization among doctors in passing on to the public the benefits of medical science was driving people to new cults, the speaker thought, stating he had every respect for members of the profession and was firmly convinced their opposition to the bill was conscientious and not prompted by selfish motives.

W. R. Stevenson, Conservative, Burnaby, supporting the bill, thought the public asking for services of chiropractors were entitled to them.

The courses chiropractors were called upon to take, Mr. Twigg thought, were just as advanced in the study of their profession as those which medical men took. Medical science was changing from hour to hour. It was absurd for medical men to say they knew nothing about chiropractic because of a few years spent in studying it. Methods of treatment were continually changing, but medical men, Mr. Twigg claimed, had made no serious study to decide if there were value in chiropractics.

FOR TWENTY YEARS

For twenty years chiropractic had been treated and people were going to chiropractors in increasing numbers. Would they have lasted that long if their services were not beneficial? The science of chiropractic, too, had also made great strides in the last fifteen years.

When the subject of a commission was discussed in the House, Mr. Twigg recalled, he agreed to it on the grounds that chiropractic was a method of treating human ailments that was recognized and within the law. The conceived rights of the medical profession under the Medical Act were fully protected in the bill before the House, which prohibited chiropractors to per-

To Relieve Catarrhal Deafness and Head Noises

Persons suffering from catarrhal deafness and head noises will be glad to know that this distressing affliction can usually be successfully treated at home by an internal medicine that in many instances has effected complete relief after other treatments have failed. Surfers and cold sea-water baths have been of great service to those and you may have been the means of saving some poor sufferer, perhaps from total deafness. The medicine can be prepared at home and is made as follows:

Secure from your druggist a 1 oz. bottle of mineral (Dental Strength). Take this home and add to it ½ pint of hot water and a little sugar until dissolved. Take one tablespoonful four times a day.

Paraffin is used in this way not only to reduce by tonic action the inflammation and swelling in the Eustachian tube, but to relieve pressure on the drum, but to correct any excess of secretions in the middle ear, and the results it gives are nearly always quick and effective.

Every person who has catarrhal should take this prescription a trial. (Advt.)

form surgery, administer medicine or anaesthetics. They were confined to the treatment of chiropractic.

COMPARE STUDY

It was absurd to say chiropractors were uneducated. They took three or four years' courses, which were not so long as those doctors took, but were given for as many as nine hours a week in the study of their particular branch of healing as doctors who took many subjects which were of no use to chiropractors.

People had a perfect right to go to chiropractors if they thought the chiropractors could do them good, said Mr. Twigg in conclusion. Sufficient evidence had been produced to show the people wanted this legislation.

Dr. G. K. MacNaughton, Conservative, Comox, said there had been no evidence to show chiropractors were qualified to treat human ailments.

BEATTY OPPOSES

J. H. Beatty, Conservative, Victoria, also opposed the bill on the qualifications of the chiropractors. He questioned the value of the standard demanded by the chiropractors' college, voicing the opinion that every chiropractor who graduated the examination. None, he thought, except other colleges failed students who could not come up to the standard demanded. He had been told he took his political life in his hands if he opposed the bill, but he was unable to support it.

Dr. H. C. Wrinch, Liberal, Skeena, emphasized the point that Mr. Justice Murphy was not empowered to report on the value or otherwise of chiropractors' services. Chiropractors should be confined to treatment of cases within their limitations.

PREMIER'S VIEWS

The right of chiropractors to practice was already specified in the Medical Act, Premier Tolmie said, in reply to the charge the scope of the committee was limited.

He recalled his early experiences as a veterinary surgeon, when he said a number of his patients faced as well as how he discussed it. At one time, he said, men without training were practicing as veterinaries and trained men sought legislation to deal with what they classed as "quacks." Through organization the situation had been met and now the profession was confined to properly qualified men.

The Premier gave his personal opinion that he would not call in the services of a chiropractor in case of sickness in his own family. He preferred a medical man. He would, however, stand or subscribe to a chiropractor's methods. However, chiropractors were permitted to practice in some provinces and people demanded their services. He thought the situation would be met if chiropractors were allowed to practice but plainly "put in their own stalls."

"M.D." AND "C."

"Put up a big 'M.D.' for the doctors and a big 'C.' for the chiropractors," the Premier commented.

T. D. Pattullo, Opposition Leader, opposed the bill on the grounds it permitted too much scope for the chiropractors to practice in comparison with their qualifications and did not offer adequate protection to the public.

"M.D." AND "C."

"Put up a big 'M.D.' for the doctors and a big 'C.' for the chiropractors," the Premier commented.

LODGE MAKES BIG STRIDES

Royal Arcanum Forging Ahead, Supreme Regent informs Local Branch

Before Majestic Council, 1513 of Royal Arcanum at 8:30 Saturday evening, Charles H. Haring, supreme regent, told of the great advances made by Royal Arcanum during the year, stating that memberships were increasing in practically every council. This was a particularly good sign, he said, since organizations generally suffered from what he asserted was a so-called depression.

The work of the order, he said, was very gratifying. An invisible cord, a bond of brotherhood, that fraternalism was built up among the English-speaking people which would ensure a continued peace. In the eastern states and Ontario and Quebec the order was doing great work with its hospital associations which cared for sick and ailing members.

"Royal Arcanum," said Mr. Haring, "has made payments of over \$260,000 to beneficiaries of deceased members, and at this time had a \$26,000 reserve fund."

LARGE B.C. INVESTMENT

The organization work in British Columbia was of particular interest to him, Mr. Haring stated, since the order had nearly \$800,000 invested in bonds in the province.

During his visit in the province, while addressing the councils, Mr. Haring urged the increasing of the provisions to have a grand council of its own instead of being jointly connected with Washington, as at present. Mr. Haring addressed the Vancouver council Wednesday evening and was presented with a class of twenty-six new members, a large embossed resolution and a large key to the council chamber, given in honor of his visit.

Mr. Haring expects his tour to keep him away from his home in New Jersey City for about two months. This is his second visit to Victoria. He attended the Royal Arcanum convention here last year when he was made supreme regent of the order.

The supreme regent was high in his praise of Victoria and expressed the wish that he would like to spend a holiday in this city which, he said, had impressed him greatly on both visits.

"There is an ever-increasing feeling of optimism in cities along the Pacific Coast, and particularly in Vancouver and Victoria, which are almost ultra-optimistic," declared Mr. Haring.

"Several industries are on the up-trend in the United States," he continued, "and conditions are much better than when I made the journey last year."

From Victoria, Supreme Regent Haring will travel to the Middle West, and from there to Ontario and Quebec.

Paraffin is used in this way not only to reduce by tonic action the inflammation and swelling in the Eustachian tube, but to relieve pressure on the drum, but to correct any excess of secretions in the middle ear, and the results it gives are nearly always quick and effective.

Every person who has catarrhal should take this prescription a trial. (Advt.)

TO ENLARGE PLAYGROUND

Improvements at Mount Douglas Park Decided By Committee

Improvements to the Mount Douglas Park picnic grounds, as decided by the Victoria-Saanich Parks and Beaches Committee Wednesday, may result in this site becoming one of the most popular recreation areas near the city.

In view of the work now in progress

through the park, from the gravel pit to a section with the road from Gordon Head intersecting the main highway, the old section of the road will be blocked off and traffic diverted over the new road.

The flat portion of the old road ad-

joining the picnic grounds will be

properly surfaced as a track for running races. The playgrounds will then extend on both sides of the site of the present road. Underbrush had been cleared off on the west side and a parkway made to make way for a smooth area on this portion.

It is anticipated the new road will

be completed in time for the summer season so the playground improvements

will be ready for the holidays.

NEW SOCIETY TO
MEET THURSDAY

General Meeting of India-Burma Group to Take Form of Afternoon Tea

The formation of the India-Burma Society Victoria has already brought together many people who have lived in India or Ceylon for long periods in the east. The membership is being extended also to former residents of Ceylon and the Straits Settlements.

A general meeting of the society at which afternoon tea will be served, will be held at the James Bay Hotel Thursday, April 14, at 3:30 o'clock.

President Peter Labay is President of the society and there is a strong executive composed of men who have spent most of their lives in India and Burma.

Those who are interested in the

society and want to attend the tea next

Thursday should notify the honorary secretary, B. O. Breton, at the James Bay Hotel.

HOOVER FLAYED BY NAVY LEAGUE

Associated Press

Washington, April 8.—A new sweeping denunciation of President Hoover's naval policy was issued yesterday by the Navy League of the United States.

The president was charged with neglect of the navy and with wrongly parading armaments as the "scapegoat" for the great increase in taxation during recent years. This charge was accompanied by an argument to show other expenditures had played the major part in building up the taxpayers' burden.

NO REPLACEMENTS

The League said Mr. Hoover had done "virtually nothing" to replace vessels which had passed or were reaching the limit of effective age, and that "while Europe smolders and Asia is a blaze, the President insists he cannot now afford even to start moderate measures for building up our fleet to treaty power."

The new attack was the most conspicuous one by the League since last October, when its president, William Howard, told Mr. Hoover among other things, with mattering "abysmal ignorance" on naval matters. That incident ended with the verdict of a special Board, chosen by the President to investigate the charges, which upheld the chief executive and said the League statement contained many inaccuracies.

Mrs. Ruth Judd Suffers Collapse

Associated Press

Florence, Ariz., April 8.—Her condition boozing on hysteria, Mrs. Winnie Ruth Judd, convicted "trunk" murderer, was in the women's ward of the state prison here to-day.

Prison officials would not discuss their transfer of Mrs. Judd from her cell into the infirmary, but it was learned the woman, under sentence to be hanged for the slaying of Agnes Anne Lerot, had been acting abnormally several days.

Mrs. Judd's appeal from her conviction was filed yesterday with the state supreme court. Her appeal will automatically stay the execution, set for May 11.

ROUMANIA HAS BIG FLOOD LOSSES

Bucharest, Roumania, April 8.—Floods which have left a trail of death and destruction throughout Roumanian river valleys for the last two days were subsiding to-day, but reports of damage done continued to increase.

As an example, it was reported 1,500 houses had been destroyed at Arad and that thousands of others had been left homeless in Besarabia, many of whom were saved from death by rescuers while they clung to the roofs of their homes and churches.

NEW PORT PLANS FOR VANCOUVER

(Continued from Page 1)

It is pointed out that if Vancouver harbor had not been aided by unusual chance, which is the estimation as being made by interests getting little or no return from the investment which the charge is levied to support, the harbor would have shown a considerable loss on operation in the past, instead of being in its present position of having been able over some years to show a surplus of revenue earnings over operating costs.

GRAIN EXPORTS

The history and results of the grain traffic through Vancouver are set out in length. The total elevator capacity available on the Pacific Coast is reviewed and declared to be sufficient for present requirements. The opinion is expressed that with a little modification in the existing equipment the port is now equipped to deliver at least 150,000,000 bushels a year, in consideration of its being an all-the-year-round port. The report finds no present need for the establishment of more grain berthing at Vancouver, "but the possibility of delivering grain from the Great Northern pier should be considered" and "it is later stated the extension of the Lapointe Pier will provide two more berths" (for grain vessels).

Sir Alexander asserts there is not at present any need for an elevator at the port, and that new elevators should only be located in such a way as to be capable of interconnection with an existing elevator, and the site with the Ballantyne Pier and No. 3 elevator is mentioned as an admirable site, with the comment that it is unfortunate from this point of view that the new fish pier has been located where it is.

MORE TRACKAGE NEEDED

There are also recommendations that existing elevators where possible should be interconnected. The opinion is expressed that the existing storage capacity is adequate for some considerable time, and the report dismisses the arguments that have been put forward for its increase, but an increase in storage yards tracks is recommended. There is a forecast a necessity for early development to be created when the Peace River area has been more fully developed and direct rail connection from there to Vancouver established. The necessity for protection of existing interests from indiscriminate competition, and that facilities are not multiplied "in temporary boom conditions" to an unjustified degree, is mentioned and transferred to the committee which the central harbor board would be concerned in, and that its views should have full weight in the decision by the board of grain commissioners in regard to the issue of licenses to elevators. The difference in conditions for grain shipment as between Montreal and Vancouver is pointed out, and it is stated that for this reason it is difficult to make relative comparisons.

LEASING OF ELEVATORS

Existing conditions at Vancouver with regard to the leasing for operation to private interests of the commission's elevators are considered. The circumstances are reviewed and the conclusion is reached that "provided adequate power is secured to the harbor authority to protect the public, I recommend the present arrangement be maintained." The passenger traffic should, however, bear its fair share of the cost of operating the port.

LUMBER EXPORTS

The lumber trade at Vancouver is then reviewed and the provision of a lumber assembly wharf discussed, and a favorable view is expressed toward it, with the stipulation that it should be located, if at all, at some point along the Fraser River (this recommendation being consistent with a recommendation for the consolidation of the Greater Vancouver area into one port which is later made).

THE PASSENGER TRADE

The passenger traffic by vessel through Vancouver is briefly touched on, and the view of the commissioners that they should provide a passenger terminal is referred to and dismissed as not considered presently necessary.

PORT FINANCES

The port's financial condition and the capital charges which the port already has to carry are commented on. There is a warning against the loading of the port with too heavy capital charges by proceeding with the development so fast "as to entail burdensome charges on traffic and eventually bankrupt the port." Recommendations are made as in the case of other ports that Vancouver's capital be written down to a sum of \$15,000,000, which would require a revenue of about \$1,650,000 to carry, instead of the \$1,940,000, approximately, now necessary, and that the consequent reduction in carrying charges be applied to a reduction of the port charges, which Sir Alexander, as before mentioned, considers too high.

VANCOUVER'S RAILWAYS

The railway situation at Vancouver is generally reviewed, the establishment and operation of the harbor railway is reviewed, with the track monopoly of the Canadian Pacific Railway for rail haul along the harbor-front and the handicap the Canadian National Railway suffers from having no Vancouver terminus. After full consideration of the existing conditions the conclusion is reached as follows:

"I recommend the Vancouver Harbor terminal railway should be abandoned as a separate unit, leaving the C.N.R. to make its own arrangements with the Great Northern for handling its traffic over the Great Northern connection to the waterfront. Part of the Hay Point site should be used for an interchange yard with the C.P.R., being the only site available though by no means ideal. The terminal railway tracks on both south and north shores should then be jointly operated by the C.P.R. and C.N.R. and switching on the western end eastward should be a joint business. The C.P.R.'s proposed sorting and switching track on the south shore just above the Second Narrows should be proceeded with as a joint yard, as soon as conditions are favorable."

"I consider it essential that while the temporary use of the harbor railway track and switching on the waterfront should be administered by the two railways, the port authority should be associated in all matters of policy, and that the views of the proposed central harbor board or other central authority should have full weight in all railway questions directly affecting the port."

COST TOO GREAT

In regard to the First Narrows bridge, there is a recommendation that the span would have to be not less than 1,200 feet, and the clearance should be 100 feet above high water. The view is expressed, however, that the cost of such a bridge would be great; there would be no justification for it from a traffic point of view for many years.

URGES USE OF TUGS

The report is made to the desirability of improvements of the navigation into and in Vancouver harbor, and any works that will result in the reduction of the cross-harbor traffic in the harbor that have occurred in many accidents, and the subject is gone into fully. In connection with this, extended investigation is recommended and the

report concludes with the following:

"The execution of any work which may be decided on cannot possibly be completed for several years, but until the present unsatisfactory state of affairs should be reduced by encouraging or insisting on the use of tugs." It is also stated harbor traffic rules require more rigorous enforcement, these regulations being declared no more stringent than is absolutely necessary to the interests of navigation while it is said they are allowed to be breached very frequently, and with apparent impunity. A strict compliance with the traffic regulations is declared to be essential.

The opinion is expressed that the pilotage arrangements at Vancouver also require attention, and it is suggested measures be adopted to enable "greater experience in the handling of large vessels before actually putting them in charge of them."

QUESTION OF JURISDICTION

The report comments on the question of jurisdiction in harbor areas as between the provincial and the Dominion authorities, and it is recommended there be negotiations to determine a policy as between two governments that will remove any opposition to the Dominion Government in any harbor area where the latter considers development necessary and is prepared to undertake it.

MCGEOUGH AND NAPIER

TWO CASES WITH WHICH THE TOLIE government has been associated will stick to it too long for its political comfort—the case of McGeough and the case of Napier. By this time the public is thoroughly familiar with the details and is not likely soon to forget them.

It will be remembered that when Mr. M. H. McGeough was called to testify before the Legislature's committee on unemployment in his capacity as Dominion government officer in charge of relief in this province he uncovered a narrative of the dealings between the authorities at Victoria and Ottawa which by no means revealed the British Columbia officials in a favorable light. Having called Mr. McGeough, however, the government members were compelled to listen to what the Dominion officer had to say; but he said so much that was to the point that the government went into a huddle with itself—or its representatives on the unemployment committee—and decided that he already had spilled altogether too many beans for its peace of mind, and that he be not permitted to put in another appearance. He had not told the story the government expected.

With Mr. McGeough out of the way, by means of a resolution debarring him from further participation in the doings of the committee, the time apparently was ripe to dig into his personal affairs. It was discovered and broadcast that Mr. McGeough at one time was holding down a job under the provincial Department of Industries—which involved his presence in an impulsive plant owned by the government in order to keep the insurance on it in force—and a minor job for the Canadian Pacific Railway Company at the same time; but he dropped both jobs, of course, when he received his appointment from Ottawa. The temptation to serve up this tit-bit to the public proved too strong for the government. It was garnished with innuendoes which were intended to give it all the appearance, to drop the metaphor, of some major crime. But when Mr. McGeough asked for permission for British fair play, to appear and refute the attacks which had been made upon him personally, not even Mr. Pooley—who never tires of telling his critics they should play “cricket”—interceded in his behalf. The public nevertheless will draw its own conclusions, since Mr. McGeough is considered a satisfactory person to represent the Dominion in British Columbia on a matter of major concern—comments of British Columbia Conservative members of the Legislature notwithstanding.

In the case of Colonel Ross Napier, Mr. Pattullo was refused permission in the Legislature to reopen the Provincial Secretary's estimates in order that an opportunity might be furnished him to read a letter from Colonel Napier in which the latter complained that Hon. S. L. Howe had not correctly stated the circumstances of his retirement from the civil service of this province. This part of Colonel Napier's statement, already made public, summarizes the complaint:

Had the minister stated the truth, as he once admitted to me, that I had to be sacrificed so that a political appointment might be made from outside the civil service one might at least have had some respect for him as a supporter of the patronage system. But the statements made by him are on a par with all other actions in connection with the matter.

More than two and a half years ago Colonel Napier, then government agent at Vernon, was transferred to Victoria to conduct a thorough investigation into the civil service, and recommend such measures as were necessary to its effective reorganization. For that purpose he was appointed departmental commissioner. During his investigation he submitted numerous reports to the government. In 1930, he said in a statement to the press last September, he was informed that he was to be appointed civil service commissioner, apparently to assist in carrying out some of the recommendations he had made. The actual appointment—in his case, however, not only was not made, but the Victoria Conservative Association was requested to nominate a civil service commissioner, which it naturally did with alacrity, and Colonel Napier was astonished to learn from that nominee—not from the government—that he was about to be superseded. As a sort of consolation prize, the colonel was offered his former post of government agent at Vernon, which, of course, was on a subordinate scale in comparison with the position in which he had been acting for two years. He refused the offer, completed his report, and then ceased to be connected with the public service.

Mr. Howe stated in the House the other day that Colonel Napier immediately had been offered his former post as government agent at Vernon “because he was not needed to continue his work as commissioner.” Colonel Napier still maintains that he was told he was to be appointed civil service commissioner, that he learned his job had been taken from under him when Mr. Roger Montie, the Victoria Conservative Association's nominee for the post, informed him he was about to take over his duties.

BUT WHY ANY AT ALL?

IN THE WORLD WAR THE SUBMARINE was known chiefly as a commerce destroyer. An article recently written by a naval officer, however, points out that the submarine has another function in which it is actually far more useful and much less barbarous—the function of acting as eyes for a fleet.

During manoeuvres, the “defending” fleet, seeking information about its rival's movements, stationed several submarines off a strategic point for observation purposes. The submarines filled the bill admirably. They were able to lurk unseen, as no surface ship could hope to, and with their radios they kept the main force fully informed. As the naval officer remarked, “No type of ship except the submarine could possibly have performed this work.”

It is good to realize that the submarine can do

valuable work without having to engage in a form of warfare which means terror and death to non-combatants. But as long as this type of fighting craft is employed at all, it will be used to its utmost capacity for destruction.

FOR ALL THE PEOPLE

AT OTTAWA THE BATTLE continues over whether the air of Canada is to be controlled by private monopoly or be nationalized for radio purposes in Britain and twenty other nations.

With a three-dollar annual fee collected by the Dominion on every receiving set, a national commission would have a fund sufficiently large to ensure the best of programmes distributed over an all-Canadian network. But the nationalization of the service here would deprive no radio listener of any foreign programmes he might wish to enjoy.

The story being spread by the monopolists that light entertainment features would be excluded from the government programmes, which would be devoted solely to serious, educative broadcasts, putting every citizen under a stern school-master of the air, is, of course, absurd. The Canadian programmes would have to be popular as well as good to hold their own, which all of them certainly do not do now. Unless the programmes meet the demands, the paying listeners may be counted upon to make their dissatisfaction known.

The main fact, of course, is that, after all, the air of Canada is national and the ownership and control of it by the state would appear to be natural. Except the United States, other countries early realized that it would be unsafe as well as unwise to allow control of the ether highway to pass under private monopoly. In the United States, interlocking corporations obtained possession before the government at Washington awoke to the situation. The measure now proposed would indicate that Canada is not to be caught sleeping and that one of our last unexploited resources is to be safeguarded for the interests of all the people.

OUR NEIGHBOR'S TAX TROUBLES

WHILE CANADIANS ARE PONDER-ing over the Rhodes budget it is interesting to note that Washington correspondents seem to be agreed that something like a “tax rebellion” is sweeping our neighbor on the south. This movement is one of bitter protest against heavy municipal and state taxes. It got into the federal picture when the sales tax was proposed—we know what Mr. Rhodes has done to the sales tax in Canada; it is back to its original maximum of six per cent—and it did it because the ordinary citizen felt that here was just one more direct assault on his pocketbook. The United States will have nothing to do with the sales tax. Back of this revolt, however, there is a widespread feeling that a steadily rising tax bill is becoming altogether too much of a burden to be borne meekly.

The present flurry in the United States may be nothing more than an intensification of the average man's perennial grumble at the financial demands of the various governments he supports. But if it lasts long enough, and becomes hot enough, it might lead to a good deal of good. A well-known critic writes:

To begin with, “it might” convince all governmental agencies, from county trustees on up to the federal Congress, that they should spend less money.

Better yet, however, is the chance that it would at least bring home to the electorate at large the terrible inefficiency and expense that any government of and by politicians always involves.

Expense, as our governments are, they can hardly cut down materially on the number of things they do. Cities can not stop spending money lavishly on schools, police and fire departments, playgrounds and the like. County governments must continue to support courts and prosecutors, and must keep extensive road building and repair programmes going. State governments must support a host of essential activities; and Uncle Sam himself, certainly, might well do more than he is doing rather than less.

The whole point is that practically every one of these activities costs a great deal more than it should—because of the waste, extravagance and graft caused by politics.

The tariff policies of the neighboring republic in the last decade, like Canada's since the advent of the present government nearly two years ago, have restricted trade. A ten-billion-dollar business in the United States has dropped to less than seven billions; Canada has cut hers in two in two years.

High tariff policies, to a very large extent, have been responsible for this—the general world condition, the aftermath of the war, can take the blame for the rest.

WHAT OTHER PAPERS SAY

DE VALERA'S PROGRAMME

The Brooklyn Eagle

We do not imagine that England will go to war with Ireland if De Valera persists. Tariff retaliation has been suggested, and this might be very injurious to Ireland. But from the logical and ethical point of view De Valera has not a leg to stand on.

EXTRAVAGANCE AND TAXES

The New York Sun

Extravagant government has put the United States in a hole. The ordinary sources of revenue no longer yield the amount of money necessary to pay the bills and balance the budgets. The extra cash needed cannot all be wrung from those once rich, for many of them have joined the worthy and worried ranks of the poor. If the government will not reduce salaries, if it will not spread the base of the income tax, then the sales tax appears to be the only way to get the last half-billion that must be had.

FARM BOARD'S FAILURE

The Chicago Tribune

The Farm Board, by hoarding grain and cotton, has kept a supply hanging over the market which is effectively preventing a rise in prices. If it were not for the board's accumulation, wheat-to-day, in the opinion of market experts, would be considerably higher as a consequence of unfavorable weather in the winter wheat belt. Whatever the farmers may have gained as a result of the board's buying they have now lost, and they will continue to pay for the board's speculations until the board's holdings have been liquidated. The farmers have lost heavily, and their loss is pyramided on that of the taxpayers, who must pay the costs of storing the grain hoard and for its heavy depreciation in quality while in storage.

A THOUGHT

Vanity of vanities, saith the preacher; all is vanity. —Ecclesiastes viii 8.

Vanity is the foundation of the most ridiculous and contemptible vices.—Adam Smith.

Across The Bay

We pass a solemn day—with our conscience exposed to full view—we vote as we please.—Mr. Manson is earnest—Mr. Twigg is sceptical—Mr. Pattullo is vacillatory—Mr. Patterson is doubtful—and we decide by one ballot.

By H. B. W.

this time of the session, feels very low and contrite.

There is a curious usage in this House; not a usage exactly, rather a law of nature, a profound, providential equilibrium. Nature seems to have devised Mr. Manson and Mr. Twigg as unique and special system of checks and balances, more perfect in its utter reliability than even the man-made system of government and opposition. Whatever view Mr. Manson takes on anything, Mr. Twigg is sure to take the opposite. And if Mr. Twigg finds merit in any proposal Mr. Manson is sure to suspect it of undermining the state. There is no personal spleen in this strange conflict, no opposing for opposition's sake. It is a perfect provision evidently decreed by the gods of politics to make sure that nothing slips through this House undissected.

Mr. Twigg championed the chiropractors as Mr. Manson had championed the medical doctors. He did it very well with that elegant nineteenth century air which makes you think of Gladstone, Disraeli and reform bills. Mr. Twigg was elegant and cogent, but probably he didn't realize any more than Mr. Manson how close a fight he was leading.

Dr. McNaughton opposed the chiropractors with all the other medical doctors, and so did Mr. Beatty and Dr. Wrinch. Their argument, now familiar to all, was that the Chiropractors Bill would leave the public with inadequate protection against quacks.

At LAST we got the government's view—not the official view, you understand, since this was a non-party bill with everyone free to vote as he liked. But it was the government's view nevertheless, however well it might be bundled up in pleasantries. It was the government's view as distinguished from the view of the government's supporters.

IT CAME, of course, from the Premier. The Premier had arrived with a neat little speech which seemed to sum up the whole issue, from his standpoint, much more concisely, much more effectively than many of the more ambitious utterances. Also, it was decorated with a few harmless barnyard references which made everyone, even the doctors, feel better. For instance, if you were a veterinarian like the Premier, you couldn't put a 2,000-lb. bull to bed if it got sick, and animal generally, unlike humans, disliked talking about their ailments. Anyway, the Premier was prepared to apply to this problem the same horse sense which he had applied to others—he could put the chiropractors in a separate box stall by themselves, and the doctors in another, he would brand the chiropractors with a big “M.D.” and then let the wisdom of the public be its guide.

MR. PATTULLO'S language was different and so was his conclusion. He spoke of “presumptive evidence,” the protection of the public and the duties of Parliament. He would oppose the bill. The division bell rang. A twelve-year fight was nearing its end. At one point, indeed, Mr. Manson proclaimed that he believed in prayer but not in prayers for chiropractic miracles. At another point he tried to make it rather rough for members favoring chiropractic when he demanded dramatically whether they were willing to sacrifice their children on the altar of politics; but it was not clear just where politics entered, since a member voting either way was sure to incur displeasure from one side or the other.

MR. MANSON's address also was notable for a devout profession of faith in the intelligence of this House, even despite its usual support of this government, an unexpected profession which may or may not have been shaken by the subsequent vote. He said the House was a cross-section of the general populace, a little above the average. Mr. Rutledge thought it was a little below. Well, Mr. Manson would assert that it was of average intelligence, but there seemed to be some scepticism about it. This House, at

any rate, went home for dinner and prepared to vote in future according to the more usual practice of British Parliaments.

Central Harbor Board For Canada Is Gibb's Suggestion

(Continued from Page 1)

are concerned, the principal users of the deep waterway will be confined for the most part to (1) the small and medium sized tramps that will bring in a cargo for a lake port and seek a return cargo, and (2) the coastwise traffic connecting the lakes with the lower St. Lawrence, the Atlantic seaboard and Newfoundland. These activities exist already and are likely to receive some impetus, but they will not imperil the position of Montreal.

TRADE-SHIPPING PORT

"A development that may be anticipated when the deep waterway is constructed will be a large expansion of the transfer between lake and ocean cargo. This employment is in fact already in progress.

"The logical and economic organization of the water borne traffic involves a transfer station at some point where both classes of vessels are most economically employed. That point is claimed by different interests to be at various places between Lake Ontario and Lake Huron. In my opinion, however, with the whole organization and equipment of Montreal at hand there is in my mind no question Montreal should deal with at least the bulk of this trans-shipment."

Continuation of the present dredging work of 30 feet from Montreal to the sea and the enlargement of all curves along the St. Lawrence is vigorously advocated by Sir Alexander.

"The operation of the ports is frequently precluded from being assured solely by the ordinary means of transportation. This is in fact must for some years to come be dependent on federal funds."

"For these reasons they must be left to a considerable amount of local control."

CONTROL OF OUTLAYS

"The operation of the ports has in the past involved a heavy drain on national treasury, and more effective control of expenditures is necessary."

"The engineering of capital works ought to be improved and strengthened."

"The local administration and executive of the ports require strengthening and stabilizing, and the organization caused by the change of the executive heads with each change of government should be eliminated."

"A form of port executive more suitable to Canadian conditions is to be found in a port manager, rather than in a harbor board."

ERROR COUNCILS

"Adequate representation of local interests and of the port users, which is present almost non-existent, is essential to the progress and efficiency of a port, and a strong local harbor council should be established on an active basis."

"The growing complexities of the importation question and the extensive development of the ports have drawn department control."

"The co-ordination of policy, the general control of finance and engineering and the administration of debts, must be more adequately secured by the appointment of a separate board dealing with the national harbors."

"One of the special duties of this board should be to examine the question of the national routing of Canadian imports and exports."

"The services provided by the ports are on the whole adequate for the requirements of traffic, and the services to users of the ports are not usually high."

"With regard to the future development of the ports, the last decade was a period of heavy expenditures on capital works, and the immediate requirement is a period of organization and consolidation, to enable full advantage to be taken of our expenditures."

"The threat of Montreal is largely history." Sir Alexander asserts in discussing the St. Lawrence deep waterway proposals. "The bulk of the traffic that is present in Montreal is likely to continue to go to St. Lawrence, leaving vessels would be at every heavy disadvantage in attempting to operate inland in competition with the specially designed lake freighters. The additional time required by them would mean a larger cost to maintain existing schedules, which would add to the cost of wages and working arrangements. Moreover, existing coastal shipping laws could have a restrictive effect on the participation of non-Canadian shipmen imperil the position of Montreal."

"So far then as ocean-going ships

METHODS CRITICIZED

"The process, at present, of authorizing expenditures and transferring money to the different harbors is too long and subject to abuse. Sir Alexander suggests that it should be limited to a committee of all the commissioners, a loan bill is required, which is passed on by Parliament. The second step is to secure an order-in-council for any contract which has been awarded by the harbor commission, and the other step, which is repeated every month, is to secure an order-in-council to pay for the expenditures of a month."

In his opinion, this last step is the one that causes the most trouble correspondence is carried on, certain procedure has to be followed and delays intervene, with the result that monthly estimates are paid from two

to three months later. Different harbor commissions, Sir Alexander states, have overcome this delay by borrowing from the banks without any securities, and the facility with which such a loan is borrowed leads to the temptation of using money for non-approved works."

The other reason for abolition of harbor commissions, Sir Alexander considers, is because harbor commissions have assumed executive direction of the harbors and staffs become over-manned. Commissioners also have the desire to do better than their predecessors on a more lavish scale.

With a port manager, Sir Alexander suggests, these abuses would not occur.

Another reason was that port officials would not have the excuse of political interference to hide their own inefficiency.

IMPROVEMENTS PLAN

Planning of major improvements and the supervision for the construction of a port should be wholly in the hands of the director of harbor engineering of the central board. Over such work the port manager and his staff would have no authority.

The finances for these several harbors would be controlled from Ottawa by the controller of finance, who in such capacity as a member of the central board, the controller of finance would have entire jurisdiction over the accounting staff of the various harbors.

Strongly supporting his proposal for a central commission at Ottawa, Sir Alexander recommends that it should be charged during construction and that the first charges on the revenue of any harbor be (1) operating expenses of the harbor; (2) creation of a sinking fund for replacement; (3) payment of the expenses on money loans to be repaid by the port manager, but look after harbors. He attributed all the irregularities which have been done to lack of co-operation and official delay in settling harbor matters at Ottawa.

GEN. R. P. CLARK DIED TO-DAY

POLICE BOARD ENDS WORK TUESDAY

REVALUATION

He recommends the fixed assets of all the ports be revalued on a basis of the cost of replacement at the end of their probable effective life, and that the capital valuation of each port be then readjusted. The amount of the interest on which may be within the port manager's expectancy to earn.

"The system is generally recognized as being unsatisfactory and has in large part lost the confidence of the users of the ports. It had many good points, but the ports in several ways have outgrown it. I consider indeed that it might have collapsed before this had not been for the department's restraining hand."

ESQUIMALT LIBRARY SERVICE

To the Editor:—Will you allow me through your column to say something regarding the attitude of the Esquimalt Council re the discontinuing of library services to the people of Esquimalt after April 30?

The library service was first introduced into Esquimalt a referendum was put before the ratepayers to say whether they were in favor of it or not. To my mind, Mr. Editor, the same privilege should be extended to the ratepayers as to whether they wish the discontinuance of the library service.

Economy is the reason the council have discontinued the library service. Then why did the councillors vote that extra \$90 as indemnities for themselves? Mr. Editor, if these councillors would forgo their extra \$480 or the total amount, we could go a long way in reducing expenses of the library at the end of the year, then put a referendum to the ratepayers at the annual election and I am sure the ratepayers will vote for the continuance of the library service.

C. H. SMITH
531 Joffre Street, Esquimalt.

CHIROPRACTORS

To the Editor:—In view of the present discussion re above, I feel compelled to state briefly the facts of my own case and trust you will be able to find room for same in your valuable paper.

About a year ago I was afflicted with a form of creeping or progressive paroxysm, which eventually totally incapacitated me from work of any kind; held me so helpless that I was unable even to adjust buttons on my clothes and could only walk with difficulty, my hands, feet and face being most affected.

I consulted our family physician, who diagnosed my case as stomach trouble and prescribed for me. I was under his care for a month and faithfully followed his instructions, but gradually became worse and more helpless.

My wife persuaded me to try a chiropractor, who put me through numerous tests occupying a week's time before he would venture an opinion, he then stated he believed he could help me.

From the commencement of the treatment I experienced improvement slow, gradual, but continued. Within a month my hands and feet were almost normal, and in three months I was back at work, and so far there is no sign of any return of the affliction and I am enjoying perfect health.

These are indisputable facts of my own case.

A READER,

TRADE EXTENSION

To the editor:—With reference to the payment of Mr. H. Hastings of \$1,000 by the B.C. government for services in connection with a trip he made to the West Indies, and which was the subject of a recent article in the Legislature, I note that the payment was vigorously defended by Hon. Mr. Maitland and Hon. Mr. McKenzie, who both extolled the value of establishing trade inter-empire and otherwise. It seems hard to understand that these two gentlemen can come forward with oratorical generalities and yet be ignorant of the exact amount of knowledge of trade and commerce, and yet be indifferent to the prosecution of a policy which in the end can be the only one to solve the greater amount of the unemployment situation. Apparently when it is not a question of defending the government's interest in trade matters, it appears that the members have never seen anything in this regard put forward publicly by either one. True enough, we have a trade extension committee under the chairmanship of Mr. Lougheed, which seems to exist for lumber trade only, and around sending logs, mainly to Australia and one to the United Kingdom in this connection has not even mentioned its activities further.

It is difficult to comprehend the mentality of officialdom which will put out sums of money for trade information, forest surveys, etc., to people who know no questions as to what is to be done, least, questionable, and in some cases of no value whatever. I have in mind the payment to Mr. Fineo of, I think, \$5,000 for a

London's Latest Just 'Shattering'

London.—Men's ties made of brightly-colored oil-cloth are the latest fashion threat.

Gary Cooper has been in town after a hunting trip in Africa... film fan girls discovered him hiding in his hotel... but Gary bolted to another hotel... people are wearing model elephants, for luck.

English schoolgirls are conquering another masculine preserve... they are taking up stamp collecting.

Sir John Reith, head of Britain's broadcasting, says he seldom listens in.

Children who went to see the waxworks at Madame Tussauds were asked which of the characters they admired. Their replies were: (in order) Nurse Cavell, Amy Johnson and Joan of Arc.

Those up-to-date west-enders who used to term most things "marvelous" have found a new adjective... now they call everything, from food to film stars, "shattering."

Unlike the old-fashioned horse-drawn sleighs that once were synonymous with the Russian scene, this "aero-sleigh" whirled into view on Moscow's snow-covered streets the other day to show proud citizens the Soviet government's newest mechanical product. The sled-like vehicle, capable of considerable speed, is driven by propellers.

ROYAL MARRIAGE TO BE POSTPONED

Paris, April 8.—The marriage of Infanta Beatrice, daughter of former King Alfonso of Spain and her cousin, Don Alfonso of Orleans, will not take place until after he has passed his examinations at the Zurich Engineering School next October, his father, Alfonso d'Orleans, said to-day.

The wedding had been expected to take place July 18.

"My son has stiff examinations to undergo at Zurich and there is no question of the marriage for some time," said Alfonso.

Enjoy a bowl of Kellogg's

PUPILS GAIN CLUB AWARDS

Canadian History Prizes Presented to Winners By Canadian Club

Young students who displayed outstanding merit in their Canadian History examinations in the entrance classes of Victoria's grade schools, reaped the harvest of their toil-to-day and yesterday when they received prizes donated by the Men's Canadian Club at special presentation ceremonies in the schools.

Led by F. M. McGregor, literary secretary of the club, prominent members of the directorate, including W. H. McDonald, president; P. B. Fowler, Kenneth P. MacLean, R. Burns, H. E. Beasley, W. A. Patterson, Col. T. Goodland and Lt.-Col. A. C. Shand, went to the different schools, where speakers from their club explained the ideas of the Canadian Club prize competition.

The members stressed the fact that the chief aim of the competition was to encourage the study of Canadian History with a view to developing a better appreciation of good citizenship among the students.

Awards will be distributed in Saanich, Esquimalt and Sidney later in the month.

PRIZEWINNERS

Those who received prizes yesterday, along with their schools, follow: Boys' Central, Roger Newberry; Girl Central, Patricia Scott; Willows, Frank Morris; Margaret Jenkins, George Price; Sir James Douglas, Joyce Goggins and Margaret McCallum (tie); South Park, Gladys Paye Cobden; Esquimalt, Kenneth Williams; George Jay, Lillian Hannah McCall; Quadra, Marjory Robinson; North Ward, Mun Hope, and Victoria West, Margaret Fry.

SISTER MARY'S KITCHEN

BY SISTER MARY

If you are at your wit's end about what to eat instead of fish, cheese or eggs, try a vegetable main course. Very often vegetables can be combined to make dishes to form a most acceptable "piece de resistance" for luncheon or dinner. If followed by a dessert made of milk and eggs, an appetizing and well-balanced meal is provided.

The chief requisite for successful vegetable dishes is clever combination. Mushrooms give a rich flavor to many vegetable combinations. Spinach and Irish potatoes, particularly, gain interest by the use of seasoning. In this connection remember that mushrooms cause meat "to taste" and are always available and can be used for flavoring. Since they are so concentrated form all month goes a long way.

A suspicion of onion lifts many an uninteresting and "flat" dish into the savory class. Mustard is another seasoning that should not be overlooked. Horseradish with "the works" is good, too. Celery and parsley fill an important place among seasonings. A little grated cheese—not enough to give a pronounced cheese flavor—adds an indescribable richness of taste to nearly all vegetable dishes.

This recipe may be new to you and help to solve the daily question of "What shall we have to eat?"

SAVORY VEGETABLES

One cup dried lima or marrowfat beans, 1 cup diced carrots, 2 green peppers, 1 Spanish onion, 1 cup macaroni, 2 cups canned tomatoes, 2 tablespoons butter, 1 cup sliced mushrooms, 1 teaspoon salt, 1-3 teaspoons pepper.

Soak beans in cold water to cover overnight. In the morning drain and parboil for five minutes. Then add this water and cook in boiling water until tender, about three hours. Add carrots, peppers cut in shreds and onion peeled and thinly sliced. Simmer until vegetables are tender and water is reduced to 8 to 10 tablespoons. In the meantime, cook macaroni in salted water for twenty minutes. Drain and add to vegetable mixture with tomatoes. Melt butter and saute mushrooms for five minutes. Add to vegetable mixture and heat thoroughly. Season with salt and pepper and serve.

VEGETABLE LOAF

Three cups stale bread crumbs, 2 cups (about) milk, 3 tablespoons butter, 2 eggs, 1 cup finely chopped celery, 1 cup finely chopped meat, 1 onion, 1 teaspoon salt, 1/4 teaspoon pepper, 2 tablespoons sifted tomato pulp, 1 tablespoon capers (optional).

Let crumbs become dry after measuring. Put into a large mixing bowl and pour over them the milk that has been scalded. Use as much milk as the crumbs will absorb and add butter while mixture is hot. Stir until butter is melted and add eggs well-beaten and remaining ingredients. Turn into a well-oiled loaf pan and bake in slow oven until loaf will take about an hour. Unmold on to a platter and serve with a tomato sauce mixed with grated cheese.

TO-MORROW'S MENU

Breakfast—Baked rhubarb, cereal, cream, codfish hash, corn bread, milk, coffee.

Luncheon—Asparagus with hard-cooked eggs on toast, new onions and radishes, canned peaches in raspberry gelatin, plain cookies, milk tea.

Dinner—Vegetable loaf, shoestring potatoes, ten-minute cabbage, steamed graham pudding with hard sauce, milk, coffee.

MEETS FATHER FOR THE FIRST TIME!

EARL DESIGNS WOMAN'S PIPE

Lord Gosford Alleged Responsible For Latest Fad in New York

New York, April 8.—Pipe-smoking, which some foolish men thought no woman could dare, has become the fad of the moment among Park Avenue's debutantes and society matrons.

Full credit for the vogue was claimed Thursday by Archibald Charles Montague Brabazon Acheson, Fifth Earl of Gosford, grandson of the Duke of Manchester.

Lord Gosford sat in a plush-carpeted suite overlooking Central Park, smoking on a miniature pipe—a three-inch, one-ounce briar. It's his own idea. He designed it for himself. He never intended, he says, that any copies should be made, but "when I came to the United States I found most of the ladies were smoking cigarettes—and grumbling about that they were violating doctors' orders by doing so."

"I watched them. They would finish one and use it to light another. They seemed to get no real pleasure from them. They said they smoked them to quiet their nerves, but it seemed to me that made them twice as jumpy."

I decided it would be just the thing for your woman to smoke a pipe. I got a pipe for my wife. Now everywhere I go I see beautiful ladies puffing on pipes."

ASKS MEANING OF STATEMENT

King Inquires in Commons About Hon. G. H. Ferguson's Empire Conference Remarks

Canadian Press

Ottawa, April 8.—What did Hon. G. H. Ferguson, Canadian High Commissioner to Great Britain, mean when he told Sir Alexander Mackenzie King, Liberal leader, in the Commons yesterday, when he told interviewers that on every hand one heard in England that since the Reformation there had been nothing of such importance at the forthcoming Empire Economic Conference?

The conclusion follows that "there is no necessity for the provision of extensive facilities at Vancouver in anticipation of traffic, nor any need to look outside Vancouver harbor for the space for expansion, for a very long time" (this being in reply to a question as to whether the scheme that had been urged for development at English Bay [Lion's Gate Island], as "there is sufficient room on the waterfront at Vancouver to handle all the port traffic that can be expected for a great many years." And this, the report continues, is the view adopted by most of the business interests. Sir Alexander was in touch with.

NEW WORKS

Proposed new works by the harbor commission and their successors are recommended for the future development of the port, consideration is given to estimated growth of the probable growth of the area referred to as Vancouver made by other authorities—the town planning commission of Vancouver at 1,000,000 population by 1960, and by the engineer department of the city of Vancouver at 1,400,000 by 1950.

While not adopting these figures, Sir Alexander believes a considerable expansion is likely within the next generation, "although the previous rate of growth may not be maintained." It is stated that the greatest acceleration by effect of the opening of the Panama Canal and the establishment of Vancouver on a great grain route. The view is expressed that except for the lumber trade, Vancouver is yet a raw material port, to a large extent, and that the port of the future implies the existence of a newer hinterland, with large population and many manufacturers."

PEACE DISTRICT GRAIN

The opinion is expressed that there is no justification for a too optimistic consideration of desired developments. It is pointed out the main sources of traffic will for a long time be grain from the Peace River district in the ten years may equal the present total export of grain through the port of Vancouver.

With regard to new works by the harbor commission and their successors are recommended for the future development of the port, consideration is given to estimated growth of the area referred to as Vancouver made by other authorities—the town planning commission of Vancouver at 1,000,000 population by 1960, and by the engineer department of the city of Vancouver at 1,400,000 by 1950.

While not adopting these figures, Sir Alexander believes a considerable expansion is likely within the next generation, "although the previous rate of growth may not be maintained." It is stated that the greatest acceleration by effect of the opening of the Panama Canal and the establishment of Vancouver on a great grain route. The view is expressed that except for the lumber trade, Vancouver is yet a raw material port, to a large extent, and that the port of the future implies the existence of a newer hinterland, with large population and many manufacturers."

With regard to the second, the proposal is not considered necessary now and when it is, it is recommended that the plan of the commissioners now be revised.

"There is no broad ground for a national policy," particularly in consideration of the fact that a part north of Vancouver "could only exist on direct or indirect sub-division."

The only recommendation with regard to present utilization of the Flumebridge Mill site is for exchange tracts for the Canadian National Railways and not for private interests can be found which want to use it "in the future of the harbor," they are given encouragement with a lease limited to ten-year periods at a revised rental for the second.

The other proposals are dealt with at other places in the report.

Your Baby and Mine

By MYRTLE MEYER ELDRED

IMPROVED DIET WILL CORRECT CONSTIPATION

Mothers discover that when they make improvements in the quality of baby's formula or increase the amounts of additional foods, the baby's constipation is relieved. New foods to which baby is not accustomed may act as temporary irritants and increase bowel activity, and additional amounts of food increase the bulk of the diet and stimulate bowel movements naturally.

Often the child is constipated due to temperament or diet, the mother should attempt to correct the diet or the formula, instead of resorting to medicines, however mild and harmless.

Constipation would seldom become a serious problem if the mother was not so preoccupied with the British public were placing him hope.

"The Prime Minister is indulging in large prophecies," commented Mr. King. "I hope he is not hububugging."

The item carried.

PIONEER OF 1852 DIES IN TACOMA

Tacoma, April 8.—Mrs. Martha Ann Lamping, eighty-two, who as a child came across the plains with the Ezra Meeker party in 1852, died at her home in Yelm yesterday. She was born in Missouri in 1850, and two years later her parents brought her to Oregon. She married Elcaine Longmire, pioneer, and she had lived in this vicinity for the past sixty-seven years. Elcaine Longmire, who died several years ago, developed Longmire Springs in Rainier National Park.

future of the harbor," they are given encouragement with a lease limited to ten-year periods at a revised rental for the second.

The other proposals are dealt with at other places in the report.

daily the time or times at which evacuations come naturally and establish the habit at those hours.

Often what a mother calls constipation is not at all so. Only the constipation of the stools—not the number of evacuations each day.

When the child is constipated, the mother

Helping Daughter Make Marriage a Success

Dorothy Dix

Finds "Hands-off" Attitude Important

The Mother Who Wishes to See Her Daughter Happily Married Will Resolve, First, to Let Her Alone, She Will Be Careful Not to Disparage Her Son-in-Law Nor to Pity Her Daughter, but Will Encourage And Strengthen Her to Face Life With a Smile

HAVE received a strange letter. It is from a widow whose only child, a girl, is about to be married, and the mother wants to know what she can do to promote her daughter's happiness and help make her marriage a success. Well, the first, the biggest and the most important thing you can do is not to go to live with her. Give the bridal couple a chance to make their adjustments to each other with no third party standing by to referee theirights. Let to themselves, they will crap and kiss and make up and no articulate harm will be done, but with mother taking sides and urging daughter to stand up for her rights, what could have been a slight scrimmage, soon over and forgotten, often develops into a forty years civil war.

Also, the presence of any outsider is a bar to the confidence that should exist between a husband and wife. Nothing is so calculated to make a young husband drop his love-making as to have to do it under an alien and a critical eye. Nor does any man feel inspired to open up his soul to his wife and tell of all his hopes and plans and aspirations with mother-in-law listening in. There is a time and a mood for telling things and this passes if he has to put off all private conversation with his wife until mother goes to bed or they can shunt her off to the movies.

Besides, a man marries a girl to get her off to himself where he can monopolize her, and half the happiness of his home is spoiled if he and his wife can never have a meal alone or spend an evening alone or even take a ride without having mother parked in the back of the car.

So, if you want your daughter to be happy and for her and her husband to grow close together, don't go to live with her. And you'll be happier, too, in your own room in a hotel or boarding house, because you will be independent as you could not be if you were an enforced guest on your in-laws and had to be always suppressing your opinion and walking on eggs to keep the peace.

Next, don't dissipate your daughter with her bargain. Don't be forever alling her attention to the faults and weaknesses of her husband. Perhaps there isn't anything to boast about, but such as he is, he is hers, and her happiness depends upon her belief that she has drawn the head prize in the matrimonial lottery.

The favorite indoor sport of thousands of mothers is picking on their in-laws. Never a fault or foible of the man and woman their daughter and son have married but they drag out and hold up for their children's inspection. They criticize John's table manners and his pronunciation and his taste in dress and the way he talks and walks and sits until they make Mary wonder what she ever saw in him that made her want to marry him.

Often it is mother who puts suspicions in her daughter's mind by wondering that keeps John out so late at night and if he really is in conference as much as he says he is and why he had to pick out that pretty blonde girl for aographer and so on and so forth.

If you want to secure the permanence of your daughter's home give her a boost instead of a knock. Don't deprecate him to her. Tell him to her. Every woman looks at her husband through her mother's eyes, and mother can make her see him as a Prince Charming or as a flop or a villain. And don't ever let your daughter tell you about her husband's faults. Any woman can turn an ant hill into a mountain with her tongue.

Don't adopt the martyr pose toward your daughter. Don't pity her because marriage doesn't come up to all of her expectations and because it isn't the combined love idyl and picnic she thought it was going to be. When she comes to you, don't mingle your tears with hers. Laugh at her. Shame her. Fuck her up.

Don't "poor Mary" her. Tell her sure, marriage is a hard job, full of work and worry and anxiety, but so is everything else in life—that is worth doing and having. Of course, husbands are unreasonable and selfish and full of cussedness and hard to stand, but just remember that she isn't any angel herself and that John has to put up with just as much in her as she does in him.

Naturally, children tie a woman down and they are a lot of trouble and call for incessant care and sacrifice, but which one of them would she like to give up and wouldn't the world be a pretty sad old place without them?

And tell her that you didn't raise your daughter up to be a quitter and a coward and that you expect her to have the strength and the courage to stand up to whatever blows life hands her and take them on the chin with a smile.

And, lastly, if you want your daughter's marriage to be a success, keep your hands off it. Don't interfere between her and her husband. Don't meddle with the way she brings up her children. Don't put your finger in her housekeeping pie. Let her work out her own salvation. It is the only way.

Powhatan Squaws and Children

When the Powhatan Indians of Virginia were on the march, it was a common thing for them to be bathed in ice-cold brooks. The women who carried the baggage. The men were willing to hunt and fish and fight the war; but the rest of the work had to be done by the squaws and the children. The "baggage" was made up of food, clothing and tent coverings.

(This story may be placed in "History" section of your scrapbook. School pupils who are studying ways of the olden Indians may use the story as a topic.)

To-morrow—A Little Saturday Talk.

Uncle Ray

An Indian Woman at Work

The squaws planted corn and other vegetables. With the help of children they took care of the growing crops. They wove mats and baskets and, of course, they did the cooking.

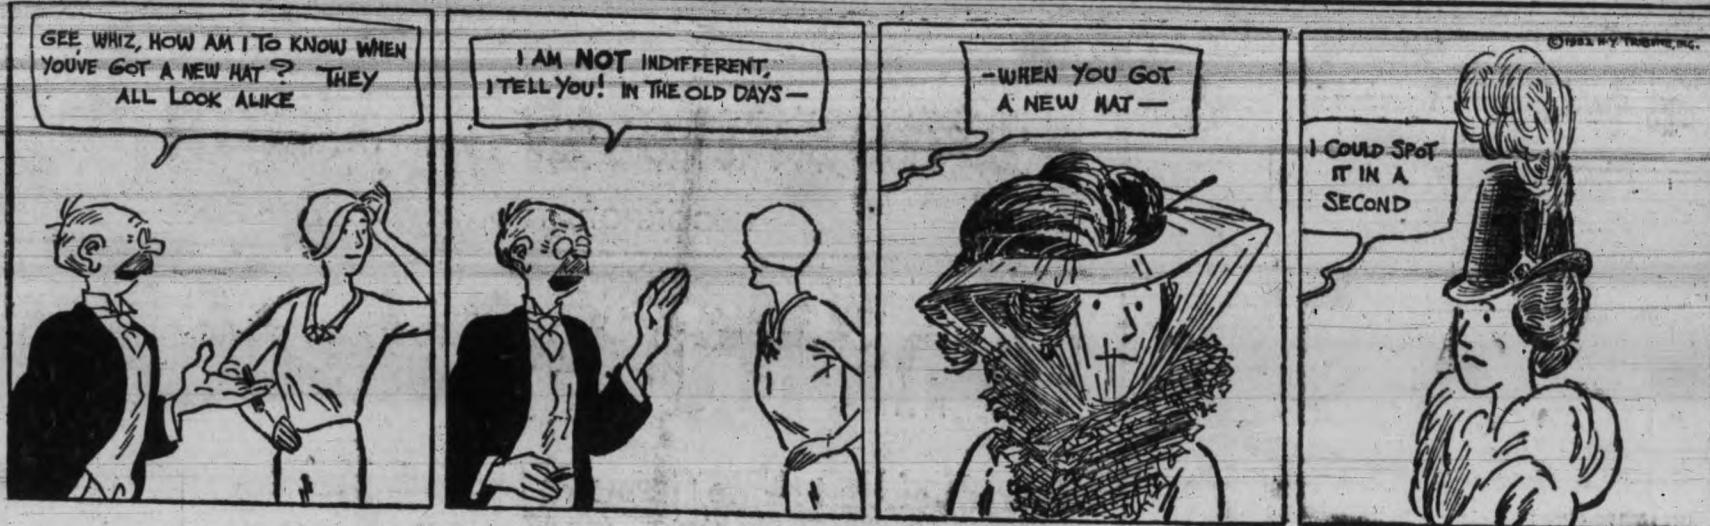

The shaving task of the women was to shave the beards of the men. An early English writer said that the shaving was done "with two shells" and that the squaws "gated two shells" and that the hair in any fashion they pleased.

I doubt that the shells—even though made sharp at the edges—were pleasant razors. Perhaps some of the wives took a quiet revenge on harsh husbands. Shaving did not need to be done often, however, because the hair of the red men grew slowly.

The women sometimes wore large deer-skin robes during winter months. Warm shawls woven from turkey feathers were owned by a few lucky squaws. In summer, the women were in the habit of dressing in garments woven from grass and tree leaves. This kind of dress was cleverly made, and it was very cool.

From an early age, children were taught to stand palm and collar without Park.

Horoscope

SATURDAY, APRIL 9, 1932

Benefic aspects appear to govern to-day, according to astrology. It is a time to rest, to renew the knowledge of future benefits.

The morning hours are read as auspicious for signing contracts and agreements.

This is a day most favorable to newspapermen and their owners. Great increase in the number of readers will be apparent, it is foretold.

Under this rule of the stars women should be stimulated to much activity.

encourages entertaining and all forms of domestic tasks.

Libraries will be more popular than in the past, the great forests and again books will be in great demand.

This should be a fortunate time for girls to do spring shopping, for the stars seem to promise success in procuring what is being sought.

Club programmes now come under a spring advance, and the sensations among women members sharp difference of opinion. Elections this year may offer many surprises.

Week-end parties should be particularly amusing under this configuration, but they may be perilous for all who desire to avoid robbing.

New heroes are to attract attention in the coming summer, when high adventures may be expected by many.

Under this rule of the stars women should be stimulated to much activity.

Fame is to be gained not only in sports,

but in contests of more serious nature in which life and death are contestants, the seers foretell.

Again astrologers forecast intense interest in the affairs of the world.

Leap year will be something more than a legend under the influence of the stars.

Women who will be encouraged to initiate in business and the professions the stars in this connection will be included to choose their own husbands.

Men who will be encouraged to initiate in business and the professions the stars in this connection will be included to choose their own husbands.

Children born on the day of this sign

will be the original and inventive.

Scientists and

mathematicians

Brentwood

The West Saanich Women's Institute held a bridge and five hundred party

Wednesday evening. Prize winners were

Bridge, Mrs. W. Watt, Mrs. A. J. Guy,

Miss Grace Murray, R. Stobie, W. O.

Wallace and E. Sims; five hundred,

Mrs. H. E. Creed, Mrs. A. Lacoursiere,

Mrs. W. O. Wallace, M. Atkins, L. Hagan

and E. L. H. Read. Refreshments were served.

"D" company of the Second Battalion, Canadian Garrison Regiment, will

hold a gala dance this evening at the Agricultural Hall, Saanichton. The hall has been attractively decorated in the regimental colors and a good orchestra has been arranged for. A feature of the evening will be Scottish dances, reels, quadrilles and lancers, led by the band.

Congratulations to Mr. Browning were extended by Hon. W. A. McKenzie, Minister of Mines, expressing appreciation that a British Columbian

had won the award.

Mr. Randolph Bruce, formerly Lieutenant Governor of British Columbia, attended the annual meeting of the Canadian Institute of Mining and Metallurgy at Montreal to announce the award.

BRUCE MEDAL IS PRESENTED

Manager of Britannia Mines Receives Award For Contribution to Industry

The Randolph Bruce Gold Medal for 1931, awarded for the most important contribution to Canadian mining during the year, was presented yesterday evening in Montreal to C. P. Browning, general manager of the Britannia Mines.

Mr. Browning was awarded the medal for efficiency in reducing operating costs in the recovery and treatment of low-grade ores which established new low records and kept 2,000 men at work during depressed conditions.

Congratulations to Mr. Browning were extended by Hon. W. A. McKenzie, Minister of Mines, expressing appreciation that a British Columbian

had won the award.

Hon. R. Randolph Bruce, formerly Lieutenant Governor of British Columbia, attended the annual meeting of the Canadian Institute of Mining and Metallurgy at Montreal to announce the award.

BIRDS
McLENNAN—On Tuesday, April 5, at the family residence, near Beaver Point, Salt Spring Island, Alexander McLeenan, son of Mr. and Mrs. McLeenan, eighty-seven years; born in Scotland and a resident of Salt Spring for the last seven years; survived by his wife, his widow; three sons, Alex of Bend, Oregon; Douglas and Murray at Beaver Point; a daughter, Mrs. John W. Smith, of Portland; Mrs. A. William and Mrs. W. Stewart of Vancouver and fifteen grandchildren.

The funeral will take place on Saturday, April 9, at the corner of Leech and the road, 11:30 o'clock, and at 12:15 o'clock services will be conducted in the United Church, recessional to the church cemetery where he will be laid to rest in the family plot in the church cemetery. Arrangements are with the Sands Mortuary Co.

IN MEMORIAM

SANKEY—In loving memory of our dear mother, Jean Sankey, who passed away April 1, 1932. She was a gentle and kind, Wonderful mother, left behind: Long days and nights she spent in pain, To care for children in vain. Till God, who knew what was best, Took her home and gave her rest. Gone to be with her son, leaving memories that death can never take away.

Memories that will always linger While upon this earth we stay.

—Fondly remembered by Ida, Wally and Anna, Vancouver, B.C.

MAX SCHMELING, THE GERMAN holder of the title, who is due to meet Jack Sharkey on June 16, in a return contest, has notified Jeff Dickson that if he is successful he will go to Paris to defend his title against any opponents.

The last time a world's heavyweight championship was fought in Europe was on June 27, 1914, near Paris, when Jack Johnson defeated Frank Moran on points over twenty rounds, with Moran winning the title in 1925 and he believes he could do it again. There should also be blood drawn between Schmeling and Carnera—but everything depends, of course, on the ability of the German to beat Sharkey.

We did anticipate a contest when Schmeling first defeated Sharkey for the title and then successfully defended it against the German boxer.

If Schmeling wins in June—and the chances are decidedly with him—it will be interesting to see whom he will be challenged.

Will Larry Gray come forward? He gained a decision over the champion in 1925 and he believes he could do it again. There should also be blood drawn between Schmeling and Carnera—but everything depends, of course, on the ability of the German to beat Sharkey.

The second fight, "The Golden Doom," was presented by Victoria High School and its legendary story of an ancient king brought out some brilliant costumes. The first play on yesterday's program, "Mother or Ether," a comedy of small town life presented by the Victoria School of Expression, dealing with the proper pronunciation of the word "ether." It is the first wedding anniversary and just before the arrival of the parents of both the husband and wife, the wife picks up her husband on the pronunciation of the word.

When the parents arrive, the mother sympathizes with their own children and the father lines up in opposition. Spasmodic appeals to the butler and the maid add to the enjoyment, but at the end, the maid gets a spa and sends the parents into a happy reunion.

The part of the maid was taken by Wilfrid Ord and that of the butler by Margaret Torrill. The wife's father was T. Edward Clark, particularly good and his wife, Mrs. R. W. Clowes. The role of the husband's father was enacted by H. A. Cox and of his wife by Miss G. McKenzie. C. Finlinson was the butler and Opal Abercrombie the maid. Mrs. Wilfrid Ord was the director.

The second play, "The Golden Doom,"

was presented by Victoria High School and its legendary story of an ancient king brought out some brilliant costumes. The first play on yesterday's program, "Mother or Ether," a comedy of small town life presented by the Victoria School of Expression, dealing with the proper pronunciation of the word "ether."

The first play, "One Hour With You,"

is the first new Chevalier production in which feminine parts are played by Jeanette MacDonald, Genevieve Tobin and Adrienne Ames.

COLUMBIA THEATRE

Buck Jones, the Columbia star, is one of the greatest exponents of the western thriller. For the last decade, Buck's derring-do, fearlessness combined with excellent acting ability, have commanded the admiration of screen audiences. "One Man Law," his newest production, is the current Columbia Theatre attraction.

CAPITOL THEATRE

The only "kickback" Rogers ever

had from any of his humorous quips was when he burlesqued Calvin Coolidge over the radio. He meant it in fun and nearly every one took it in that way, except for a few who really thought it was Mr. Coolidge speaking. They sent chiding letters to the White House.

Rogers was quite upset, and immediately wrote apologetically to President Coolidge. To this Mr. Coolidge replied in a two-page letter written in his own hand writing, commending Rogers for his good sense and for his good taste, and saying that he thoroughly enjoyed the travesty.

In "Business and Pleasure," Rogers's latest Fox Film starring production, which is now at the Capitol Theatre, he plays the role of a middle western "Babbitt" type on a combined pleasure tour to Northern Africa.

PLAYHOUSE THEATRE

Willie Fung, Chinese actor, is a South Sea Island storekeeper in Paramount's adventure-romance, "The Sea God," featuring Richard Arlen, Fay Wray and Eugene Pallette, and now at the Playhouse.

Fung, a graduate of the Chinese stage in San Francisco, last appeared for Paramount as the caretaker and cook in "Dangerous Paradise." He also portrayed the ranch cook in "Frontier". He has been playing in pictures for the past ten years. Born in China, he came to San Francisco as a youth and starred his theatrical career there.

"A Duet of Cupids," presented by the Beaux Arts Society under the direction of Henry Worthington, was a light social comedy dealing with the blag of the modern young things to the matter of giving birth.

Peter (Ted Simmons) had given a ring to Marjorie (Pat McConnon), evidently considering that it would be safer on her finger than in his pocket. But the innocent gossip fodder for the circle of their friends, roles taken by Johnnie Macleod, Kate Parker, Betty Monteith, Jim Findley, Betty O'Brien, Hugh Melville, and an amateur skit is the result.

The final play, "The Bishop's Candlesticks," was a presentation of the Fairfield Players under the direction of Mrs. George Nixon. The French bishop befriends the escaped convict who comes to steal food and valuables, and finally the bishop gives the convict his two candlesticks, which his mother handed to him on her deathbed. The story is a moving one and was well handled by the members of the Fairfield group.

Denis Humphries interpreted the role of the bishop and Henry Eke scored as the convict. May Johnson played the complaining sister of the widow. Grace Keefe was Marj, the maid, and Douglas Nixon the sergeant of gendarmes.

WHERE MOST PEOPLE TRADE

NEWS IN BRIEF

A. Danicus pleaded guilty in the city police court this morning to a charge of driving to the common danger and was fined \$20.

Compensation of \$40 for loss of three ewes and four lambs killed by dogs was voted by J. L. Swales of Royal Oak yesterday evening by the Saanich Council.

The Saanich Council yesterday evening approved renewal of the Victoria-Saanich beach and parks agreement. The customary by-law was given preliminary reading.

The Victoria branch of the Amputation Association of the Great War will hold its annual dinner in the Empress Hotel to-morrow evening, starting at 7:30 o'clock.

Officials of the liquor board announced the beer licenses of the Goldstream Hotel and the Vernon Hotel at Vernon have been suspended indefinitely for infractions of the Liquor Act.

The Saanich Council has tentatively arranged to hold a joint meeting with the School Board on Tuesday evening at 8 o'clock, for discussion of Hon. Joshua Hincliffe's proposed new school taxes.

Before anyone condemned Japan's policy in Manchuria, they should remember that that country did not belong to China and never did. Thomas McInnes, former resident of Canton, told members of the Canadian Club at their luncheon in the Empress Hotel to-day.

When Japan adopted warlike tactics the world should also remember Japan had been led to believe from the treatment she had received from the western World these were the only effective.

As far as Canada was concerned, it was to its interests to side with Japan, since that country was the Dominion's third largest market. Trade with Japan would increase in times of prosperity, he said.

Canada should be a part of China. That is something we should remember at the outset," he said. People were apt to think Japan had tried to steal Manchuria from China.

In 1643 the Manchus started to conquer China. Mr. McInnes said. When in the saddle at Peking the Manchus passed Chinese Exclusion Act, separating Chinese from Manchuria. That country was always headed by a native born governor, he said, adding these facts had a far-reaching influence which had become apparent in the recent struggle.

Manchuria differed "a great deal" topographically from China. It was well-forested with fine hard pine and hard woods. China, on the other hand, was comparatively denuded.

Manchuria was a land of immense fertility. It contained great deposits of coal and iron ore. It was a country well worth having and worth fighting for. In climate it greatly resembled Alberta and had three fine ice-free seasons.

WHAT RUSSIA WANTS
"Those are what the Russians want," he commented.

The original Manchu element was no longer to be considered. It has been reduced to about 1,000,000, Mr. McInnes said.

Turning to the dominant militaristic element in Japan, Mr. McInnes stated that the Japanese had been fighting Manchurian tatars who crossed to Japan and mingled with the Malay element coming northward. In the islands these were fused about 2,000 years before Christ, into a distinctive Japanese race "almost crazily devoted to their gods."

The first emperor of Japan reigned 2000 years ago, he said. All Japanese now carried a strain of royal blood in their veins, he said.

Early Chinese Buddhist missionaries had given this hardy agricultural and seafaring race a superficial Chinese culture. But although they might appear alike to westerners, Japanese were more different to Chinese than Canadians were to Americans.

Mr. McInnes spoke of the demolishing of invading hordes of Kublai Khan by a typhoon in the twelfth century.

In the sixteenth century they were again bothered by the Christians who when they tried to place the pope above the emperor, were destroyed.

Up to the middle of the last century the Japanese were left alone. On those dates the United States and Great Britain forced treaties upon the Japanese and opened up the island of trade.

A strong protest against erection of shacks and cheap residences in Saanich was filed with the Saanich Council by Mr. Danicus. The council decided to remove the structures and the neighborhood deteriorated the neighborhood and discouraged others living nearby. The complaint was referred to the building inspector.

The Saanich attended fifty-six complaints during March. Chief Rankin yesterday evening reported to the Police Commission. There were four motor accidents and two cases of breaking and entering. Chief Rankin commented upon the absence of prowlers during the month. Police fines, license fees and poll taxes collected by the police in March amounted to \$403.

He told of the murder of a sacrificial British consul in the middle of the nineteenth century. In those days the Chinese were afraid to go to the police, he said.

Following European methods, Japan built up an army and navy and attacked Korea. The Chinese-Japanese war ensued and China lost "face" and territory. The intervention of other powers, principally Russia, prevented further invasion.

A decade later the Japanese struck again, this time against Manchuria as a result, Mr. McInnes said. The United States' attitude to Japan cooled when it realized the growing strength of Nippon.

Lack of man-power by the Japanese caused the latter to have the Pekin government repeal the Chinese exclusion act which prevented the Chinese from immigrating to Manchuria.

Ravages of Chinese militant forces on the Chinese peasants caused the latter to immigrate to Manchuria.

From 1916 to 1926 over 22,000,000 Chinese went into Manchuria. They were welcomed by the Japanese and Manchurian rulers, the speaker said.

Chinese politicians saw the development of the rich Manchurian areas and then desired it.

CHINESE WANT MANCHURIA

Since then they have been determined to rule the world, the Chinese only can in an effort to secure Manchuria, Mr. McInnes said.

The attitude of the League of Nations in ordering the withdrawal of Japanese from Manchuria could only be understood as a move of the League to rule the world in co-operation with the United States.

At the same time, the speaker said, the Chinese wanted to rule the world in co-operation with the United States.

Acting for a client, G. H. Sedger, barrister, reported to the police that \$10,000 in Dutch Government bonds was lost yesterday in the downtown section, somewhere between the Post Office and the Hudson's Bay Company store. There were three \$1,000 registered bonds and six \$500 bearer bonds, it is understood. The numbers are known and the finder is requested to communicate with Mr. Sedger or the police.

FUNERAL SATURDAY

The funeral of Alexander McLennan, who passed away at his home near Esquimalt, Saturday afternoon, April 7, took place yesterday afternoon at the church of St. John the Evangelist, B.C., the residence of Mr. and Mrs. John F. Cochrane, Canmore, Alta., for assisting in the rescue of John Cavanaugh from drowning in the Oyster River near Courtney, B.C., July 23.

The service will take place last night at the church of St. John the Evangelist, B.C., the residence of Mr. and Mrs. John F. Cochrane, Canmore, Alta., for assisting in the rescue of John Cavanaugh from drowning in the Oyster River near Courtney, B.C., July 23.

John Cavanaugh, 16, died Saturday night at the bottom of the pool, diving for Cavanaugh, whom they could see at the bottom of the pool.

After getting him out they used artificial respiration and saved his life.

RORY MCRAE DEAD

Special to The Times
Vancouver, April 8.—Rory McRae, a former Nanaimo resident and brother of Harry McRae, Nanaimo, contractor, died here yesterday evening.

FUNERAL RITES HELD

The funeral of Mrs. Annie Bailey took place yesterday afternoon at the church of St. John the Evangelist, B.C., the residence of Mr. and Mrs. John F. Cochrane, Canmore, Alta., for assisting in the rescue of John Cavanaugh from drowning in the Oyster River near Courtney, B.C., July 23.

FUNERAL RITES HELD

The funeral of Mrs. Annie Bailey took place yesterday afternoon at the church of St. John the Evangelist, B.C., the residence of Mr. and Mrs. John F. Cochrane, Canmore, Alta., for assisting in the rescue of John Cavanaugh from drowning in the Oyster River near Courtney, B.C., July 23.

The service will take place last night at the church of St. John the Evangelist, B.C., the residence of Mr. and Mrs. John F. Cochrane, Canmore, Alta., for assisting in the rescue of John Cavanaugh from drowning in the Oyster River near Courtney, B.C., July 23.

John Cavanaugh, 16, died Saturday night at the bottom of the pool, diving for Cavanaugh, whom they could see at the bottom of the pool.

After getting him out they used artificial respiration and saved his life.

Toronto Leafs Take Strangle Hold On World Hockey Title

THE SPORTS MIRROR

Major League Clubs Head North to Start New Season

All Clubs Have One or Two Promising Rookies on Their Rosters

Last Year Produced Two Great Players in Martin and Vosmik

Myrtle Cook a Little Previous in Selecting Olympic Performers

SIXTEEN major league ball teams are headed for their home parks by easy stages. The spring training will soon be a memory, gay and promising for about thirty young players who have been carted along, and grave for some of the veterans who have appeared for the last time at the expense of their health. There is no team that has not been lucky in getting at least one or two promising recruits. The rookies are eager for the big test that is soon to come. Columns have been written about the new diamond athletes. There have been disappointments, but in the main, the sound minor league ball players who came up for their chance to show up again to get posts. It is hard at this time to say which team picked up the best men.

Actual playing alone will determine that. Some keen students of playing form who have been looking over young men in the spring for years say that the New York Yanks have the pick. Gouetta, the kid from the Pacific Coast, others will point out that the Chicago Cubs have the greatest young player in Stanley Hack, picked up from Sacramento. He will open the season with the Cubs at third base and promises to become a star in his first year. It seems to be the opinion in the West that the New York Giants have picked a coming star in Koenig, who has been pounding the ball with great gusto in exhibition games. Manager McGraw said before the start of the season he needed but one batter and he appears to feel that Koenig is that man.

One year makes a lot of difference to a ball player. The same away from the training camps last season athletes who are now world-famous. One of them is the idol of the fans wherever his team plays. A year ago the experts did not think he could hit well enough to hold a position. Six months later his name was on the tip-of every tongue the mentioned baseball he is "Peerless" Martin. The young Joe Vosmik of the Cleveland Indians, Vosmik has not earned the fame that the St. Louis player has acquired, but has developed into one of the leading players in the majors in the space of one year. There may be another Martin or Vosmik in the group of recruits who are being sent back to the major ball parks. Time will tell.

Although the Canadian Olympic trials do not take place for nearly three months, Myrtle A. Cook, in the Montreal Star, names five girls for Canada's relay team and it would appear that she has a preference for them. They are Lillian Palmer and Mary Frizzell, Vancouver; Josie Labbe, Halifax, and Bide, Lake, Montreal, and Mary Farnell, Toronto. As Myrtle Cook is secretary of the Canadian Women's Amateur Athletic Federation, and has much to do with running the show, her selections will count quite a lot.

Beatrice Gillespie, Edmonton, won the Canadian women's 100-metres and 200-metres at Wetaskiwin, Alberta, last summer and Lillian May won the senior 100 and 200-metres championships. In winning her two titles, Miss Gillespie defeated Josie Labbe in each event and Eddie Proctor, Ottawa, defeated the Halifax girl in the 100-metres heat and final.

The secretary of the C.W.A.A.F. may have some personal reason for excluding the names of Lillian May, who has been, if she is not at the present time, one of her pupils, but it is rather surprising to find she has also left out the names of Beatrice Gillespie and Eddie Proctor, and there may be half a dozen other girls with at least a chance of making the Canadian Olympic team. This country does not seem to think the secretary of the Canadian body should show a preference for any girls, with the Olympic trials, as already stated, three months in the offing.

Joe Simpson, who used to play hockey with the Edmonton Eskimos, in the former Western Canada League, and now member of the Canadian amateur Legion, is said to be slated for promotion. He is being lined up with the New York Americans. At least eastern hockey critics have it doped out that way, and, in addition, Eddie Gerard, now piloting the Gotham club, will seek a new berth.

Al Foreman Loses His British Title

London, April 8.—The British Boxing Association yesterday deprived Al Foreman, Montreal fighter, of his title of lightweight champion of Great Britain, for failure to comply with its regulations. The association announced it had chosen Johnny Cuthbert and Ned Tarleton, British fighters, to contend for the vacant title.

Blasting Attack In Third Period Defeats Rangers

Leafs Drive Through Fading New York Club for Four Goals to Hang Up 6-to-2 Victory in Second Game of Stanley Cup Finals at Boston; Rangers Slip Badly After Taking Early Two-goal Lead; One More Victory Will Give Toronto Stanley Cup; Third Game at Toronto To-morrow Night

Boston, April 8.—A world hockey championship, becoming less and less a shimmering mirage, beckoned Toronto's Maple Leafs to a homecoming welcome to-day.

One more victory in the glamorous Stanley Cup series and the reality of the reward will snuff out the last flickering hope of the New York Rangers.

In amazingly convincing fashion the Leafs yesterday evening turned back the powerful New York Rangers for the second successive time and romped off with the game by a 6-to-2 score.

Their superiority stood out in every department of play. From Long Chauvin's great "kid" forward line, the Leafs outlasted, outflown and outplayed the fading Rangers.

Thirteen thousand Boston fans, coming this Stanley Cup play-off, transferred by necessity from New York, frankly tossed their allegiance to the Rangers at the start. But they remained to witness the same old Toronto machine that rolled slowly into action and finally flattened the New Yorkers by its gathering momentum.

RANGERS TWO UP

Down two goals as the Rangers promptly took advantage of early breaks the Leafs went to work with a smoothness and precision that betokened trouble. One goal, two goals—over ten terms and the last period remaining.

Tenacious checking, a strong defense and a superb fast-thinking held them off. As the Rangers swarmed in to battle far across Toronto's blue line, the Leafs fought back, watched their openings and broke away in sudden flight in twos and threes.

Backing checkers were dropped swiftly behind, and the great Ching Johnson, looming large on the Ranger defense was the picture of belligerence. With the Leaf wingmen flamed by him, threatening a pass with every stride. They swooped in upon John Ross Roach and the odds against the agile little goalie were terrific.

LEAFS GET FOUR

Four cleanly earned goals whizzed by the tiny net-minister in the third period, bringing to six in a row the total amassed by the Leafs.

Off to a commanding start, Rangers brought a great cheer from the "neutrals" when Eun Cook stretched out to snap a pass from Brother Bill and rifle a shot past Chabot. They ended the first period with a 2-to-1 lead and promptly added to it. In the second Doug Brennan was allowed to breeze through uncheckered and when he reached the Leafs' defense he cut sharply around and swung past the rear guard. Chabot came out to meet him but Brennan made his shot sure.

Harvey Jackson started the combined "kid-versus-kid" drill that put the pair right in the New York team. A sudden dash over the blue line, a hard, well-placed shot and Jackson had tallied. Charlie Conacher streaked over from the boards and whistled a shot past Roach and the rout of the Rangers was under way.

CLANCY STARTS SPREE

The veteran Leaf defenceman, King Clancy, started the scoring bee. Teaming with Joe Primeau, he took a pass while in front of the net and rapped it past Roach. Jackson followed with a combination with Jackson on wide passes, drove in an counter. Clancy scored his second, again paired with Primeau. Hal Cotton flipped in Primeau's pass for the final goal.

Both teams left yesterday evening immediately after the game and will arrive in Toronto late to-day. The third game will be played there to-morrow and a fourth and fifth, if necessary, on Tuesday and Thursday of next week.

Line-up: Toronto—Chabot; Horner, Clancy; Primeau, Conacher, Jackson, Subs: Blair, Bailey, Cotton, Day, Levinsky, Finnigan, Gracie, Miller, Darragh and Robertson.

Rangers—Roach; Selbert, Johnson, Boucher, Bill Cook, Bun Cook, Subs: Mills, Gainor, Murdoch, Keeling, Desjardins, Somers, Heller, Dillon and Brennan.

First period—1. Rangers, Bun Cook (Bill Cook), 3:33. Penalties: Somers, Finnigan, Cotton.

Second period—2. Rangers, Brennan, 1:09. Toronto—Jackson, 5:7. 4. Toronto, Conacher, 6:35. Penalties: Johnson, Brennan, Day.

Third period—5. Toronto, Clancy (Primeau), 1:49. 6. Toronto, Conacher (Jackson), 8:07. 7. Toronto, Clancy (Primeau), 5:5. 8. Toronto, Cotton (Primeau), 6:19. Penalties: Jackson, Keeling, Cotton.

ADANACS TO PLAY WITHOUT E. LEE

New Westminster, April 8.—The Adanacs team to travel east in pursuit of a third Canadian basketball championship for New Westminster, has been reduced to seven with the announcement yesterday that Ernie Lee, peppy forward, will be unable to travel. Ernie, a school teacher, is busy with exams and joins Doug Fraser's guard, with the stay-at-homes. The team leaves to-night at 10 o'clock for Lethbridge, playing their opening series with the Alberta champions, Raymond's Union Jacks, on Monday and Tuesday. The boys have been practicing every night and are in fine trim. Those who will travel include Harvey McIntire, Max Shiles, Bill and "Steve" Gifford, "Click" Hood, Jack D'Easum and "Hop" Wilkie.

"Herb" Pruitt, the left-handed "screeball" pitcher with the St. Louis Browns, was named "greatest jinx" said "It's a funny thing, but he either struck me out or I got a base hit off of him," continued his Louis. "I remember facing him fifteen times and he struck me out thirteen times, but I sandwiched in a double and a homer in between the times I was knocking all the air out of the park."

"I sometimes face pitchers with the most 'stuff' is easiest to hit. We used to murder Dazzy Vance in exhibition games."

"The first time we faced him he walked over to our bench and asked us if we liked to hit his 'bird-shot.'

"Those who will travel include:

Harvey McIntire, Max Shiles, Bill and "Steve" Gifford, "Click" Hood, Jack D'Easum and "Hop" Wilkie."

Lewis's Headlocks Beat Tiger Daula

MEETS BROOKS

Claimant For Heavyweight Wrestling Title Takes Two Falls in Vancouver Bout

Daula Takes Lone Fall in the Fourth; McLaughlin Loses First Bout in Over Year

Jack Pratt Throws Stick That Ends Series; Reds Won in Three Straight

Vancouver, April 8.—Taking the third and deciding fall in the fifth round of a scheduled eight-round bout, Ed. "Stranger" Lewis, claimant to the world heavyweight championship, defeated Tiger Daula, giant East Indian, in a main event wrestling match here yesterday evening. It was the second meeting of the pair—and Daula's first defeat since coming to this country, the previous match between the pair ending in a no-fall draw.

The bout started out slow, with each grappler working cautiously for an effective hold. Lewis drew first blood in the third, when he took the first fall with series of rabbit punches and head locks that left the Hindu helpless. Lewis put Daula's shoulders to the mat as a mere formality.

Daula came back strong in the fourth round, but was beaten by the Hindu boy with the famous headlock. Daula took advantage of one of Lewis's attempts for a headlock to apply a flying mare and body press, and even the match.

DECIDING FALL

Lewis weighed in at 255, Daula, 240. In the main event, Ed. "Stranger" Lewis, 180, and Tom McLaughlin, 170, squared off.

McLaughlin, 180, was the first to fall, but he got up and went on ahead of Lewis. Lewis, 180, was the second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the tenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eleventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twelfth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fourteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventeenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the nineteenth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twentieth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the twenty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirtieth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the thirty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the forty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the fifty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the sixty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the seventy-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-eighth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the eighty-ninth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-first to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-second to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-third to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-fourth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-fifth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-sixth to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-seventh to fall, but he got up and went on ahead of McLaughlin. Lewis, 180, was the ninety-eighth to fall, but he got up and went on ahead of McLaughlin.

Victoria Sends Vancouver Rugby Final Ultimatum

**Play On April 16
Or Not At All Say
Canadian Scottish**

City Senior Champions Set Week From To-morrow as Latest Date on Which They Will Meet Terminal City Club Champions for British Columbia Title; Loss of Players, Harder Grounds and Chances of Injury Given as Reason for Demand

Unless the Vancouver Rugby Union accedes to the terms of the Victoria organization, neither the Terminal City nor Capital fans will see the Canadian Scottish, local champions and co-holders of the provincial title, battle in a final for the British Columbia senior club rugby crown. Announcement to this effect was made by Fred Cabeldu, secretary of the Victoria Union to-day. If the game is not played on or before Saturday, April 16, there will be no game, Cabeldu said.

The Canadian Scottish, who qualified to meet the Vancouver champions, will not be able to field a team after April 16. The boys themselves feel the season has been extended too far. And with injuries having removed many of the team from the playing lists, the chances of further physical harm to the men on the rapidly hardening grounds are considered too great.

ORIGINAL PLANS
The final was originally scheduled for Victoria a week from Saturday. On that day the locals were billed to meet the mainland winners. Last week, Ex-Magee further confused the Vancouver League tangle by inadvertently trouncing the Rowing Club, who were figured to represent the Terminal City in the final.

From wordily received from Vancouver, it appears these two teams have still to settle their argument and there are reports current that Ex-King George, who died the Scots last year, still is in the picture.

Johnny Rowland, all-Canadian and long rated one of the best forwards in the Dominion, will be out of town after April 16. Jack Horsey, one of the Highlanders stalwarts, will be in the hospital and half a dozen other men who started with the squad are on the injured list.

Despite the fact that Godfrey Wenman, Cy Bernard, Jack Bryden, Bill Oliver, Brian Hulme and others regularly won their heats on the sprints and the game has been played on April 16, the Scots were optimistic over their chances. But the loss of two other stalwarts is figured just a little too much, so the squad has issued an ultimatum.

Unless Vancouver accedes to the capital's terms the game is off.

GIRLS TO ROW THIS SEASON

Will Form Group of "Oars-women" at J.B.A.A. This Summer

Two four-oared women's crews will be trained this season by the James Bay Athletic Association.

Several of the local girls have stated their desire to compete in the rowing. In doing this, however, and other women wishing to take up the sport are advised to communicate with the rowing coaches as soon as possible in order to gain places on the crews.

Providing the fair sex crews shape up well, they will make their first public appearance in the May 24 regatta. They may also compete against Vancouver and Kelowna clubs in the M.P.A.O. meet.

Two senior oarsmen will be selected to coach the crews. At Wednesday evening's meeting of the rowing committee, at which the decision to allow the women to take up the sport was reached, Ray Hutchison was elected assistant coach to look after some of the junior crews. The gratifying number of newcomers to the game made it necessary to secure extra instructors and coaches.

Brushing Up Sports By Laufer

B.C. Wrestlers and Boxers Show Class

Provincial Championships at New Westminster Produce Outstanding Bouts

Victoria Entries Turn in Victories; George Lovatt Beaten in B.C. Final

New Westminster, April 8.—One of the finest shows of boxing and wrestling seen in some years was presented at the opening of the New Westminster Amateur Athletic Association's British Columbia championship meet at the Queen's Park auditorium yesterday evening. Two final events were run off. H. M. Knight, of the

Vancouver Firemen's A.C., won the provincial light-heavyweight wrestling championship when he took two straight falls from G. R. Lovatt, Victoria Y.M.C.A. The bout was fast from start to finish, Knight taking the first fall in less than three minutes with a cross body and bar arm, and the second fall after another three minutes with a body slam.

Gordon Oram, North Vancouver, took the championship in the flyweight division of the boxing when he was awarded a decision over Victor Grant of V.A.C. in a clean, fast bout.

Probably the best bout of the card was that between W. L. Thompson and J. J. Hutton, Pender A.C., in the middleweight boxing class. Thompson, who hails from George Heriot's College, Edinburgh, Scotland, and is one of the "dark horse" entries in the boxing division, fought under the colors of the Coquitlam A.C. Thompson was awarded the decision after three slashing rounds.

EVERYONE'S SURPRISE

The biggest surprise of the evening was the defeat of Jack Eichoff, popular pugilist of the Victoria G.O.A. Wrestling Club, at the hands of his clubmate, J. Bodley, by a decision after wrestling through an overtime session. Eichoff was looked upon to take the place of Frank Peterson, the ex-champion, who found himself unable to stay in the competition because of an old injury which has not healed.

Steve R. V. Macdonald, who referred the wrestling, and Fred Lynch, third man in the ring during the boxing events, handled the fights to the entire satisfaction of the crowd.

Results of bouts in which Victorians participated follow:

WRESTLING

Lightweight—Pete Tyson, Victoria Y.M.C.A., beat H. Patterson, V.A.C. one fall.

Middleweight—Harold Luney, Victoria Y.M.C.A., from F. McDonald, V.A.C., by default.

Final light-heavyweight — G. R. Lovatt, Victoria Y.M.C.A., lost to H. Knight, of Vancouver Firemen, in two straight falls.

BOXING

Lightweight — A. Dawkins, Victoria Y.M.C.A., defeated T. Ladysmith, decision in an extra round.

Welterweight — R. Hocking, Cana-

Headaches Will Improve Golf

Blank Detroit 4 to 0 to Take First Place in International League Final

Victory Sunday Will Give Bisons Title; Windsor Turns Back London 3 to 0

Toronto, April 8.—Canadian hopes for retention of the International Hockey League championship and the Oke Trophy, won last season by Windsor Bulldogs, appear dull to-day as Buffalo Bisons are riding at the head of the round-robin play-off series with but a single game to play.

Blanking Detroit in Fort Erie last night, Bisons jumped into the leadership and need but a single victory over Olympics, Sunday, to clinch the title.

London and Detroit both slipped back as a result of their shutouts at the hands of Windsor and Buffalo, and to-day the standing appears in ladder formation. Buffalo held the race with seven of eight points, Windsor follows with seven and London are next with six. Even Detroit have an outside chance of tying Bisons for the championship. Sunday, providing Windsor and London play to a draw, Saturday.

Further demonstration of the sensational work of International League goalkeepers was given yesterday evening when both games ended in shutouts.

Playing when both games ended in shutouts, the Bisons won from Detroit 4 to 0 and Windsor triumphing over London 3 to 0. Of the ten games played in the championship series, seven have ended in shutouts, three of them scoreless draws.

GORGE VALE AT COLWOOD

Interclub Golf Match Scheduled Sunday; Draw and Starting Times Announced

Teams from the Colwood and Gorge Vale Golf Clubs will engage in another of the series of inter-club matches on Sunday on the links of the former. Two strong sides have been selected by the respective captains and a keen fixture is anticipated.

Fourballs will be played in the morning and singles in the afternoon.

The draw and starting times for the morning matches follow, with the Gorge Vale players first named:

10:15 a.m.—J. Todd and Capt. C. L. McDonald vs. H. Lineham and D. Edmonds.

10:10 a.m.—Frank Thomas and H. D. Reid vs. Bob Schwengera and Harry Meares.

10:05 a.m.—R. Foullis and H. J. Davis vs. H. E. Brown and R. W. MacKenzie.

10:00 a.m.—R. Foullis and T. Angus vs. Dr. N. J. Gibson and Geo. Straith.

9:45 a.m.—F. C. Sildell and D. Fyvie vs. J. N. Findlay and J. H. Richardson.

9:35 a.m.—Red Lawson and G. S. Gow vs. Ross Hocking and Gordon Dow.

9:20 a.m.—R. C. Feder and R. W. Watson vs. J. V. Morton and A. W. Miller.

Reuter's Special to The Victoria Times

London—London's knowledge of the Far East has been increased by the exhibition of colorful paintings of China, Japan and Manchuria made by that indefatigable traveler, Mrs. Alec Tweedie, who visited those countries by way of Moscow and Siberia.

This artist is also, of course, the author of many vivid travel books. Her latest volume of "Me and Mine" is to be published shortly. Mrs. Alec Tweedie lives in a palatial flat overlooking the Green Park. It is a kind of "Palace of All Nations," for it is packed with rich oriental hangings, eastern curios, books and paintings—all souvenirs of her many adventures in strange lands.

SHIP THAT INSPIRED CONRAD

Taking of travel, they have just placed a model of the three-masted sailing ship Torrens in the South Kensington Museum. This was a ship in which Joseph Conrad, the novelist, once sailed as mate and she must have inspired many of his sea stories.

The Torrens was built in 1875 for the passenger trade between London and Adelaide, Australia. Her record run for the voyage was sixty-four days. That was when Captain H. R. Angel (one of a famous family of sailors) was in command of her. Afterwards her speed fell off. Then the Italians bought her to sail the Mediterranean. Her end came when she ran ashore, and she was finally broken up for teak and copper.

Wheat Tumbles On Poor Exports And Liverpool Weakness

Canadian Press
Winnipeg, April 8.—Influenced by weakness of Liverpool wheat quotations and absence of any export trade grain prices took a pronounced downturn in the pit to-day. Values at the close were 1½ to 2½ lower than yesterday's final figures.

May and July each lost 1½ at 60¢ and 62½, respectively, while October gained 1½ to close at 64¢.

Rough weakness at Chicago near the close due to uncertainty over activities of the Federal Farm Board and a nervous security market further contributed to weakness here.

Little export trade was worked overnight. There appeared to be some transaction near the close but figures could not be confirmed. It was not of sufficient proportions, however, to make any impression on values.

A report from Washington stated

that the House of Representatives were considering transferring the activities of the Federal Farm Board to the Department of Agriculture. This report had a disturbing influence at Chicago, which, in turn, was reflected here.

Advice from Europe offered little encouragement and the Liverpool market eased off in the final stages.

Brazilian wheat saw some inquiry for Canadian wheat but did not find the firmness of Argentine offers fully responsible for steadiness abroad.

Demand for cash wheat and coarse grains were unchanged to slightly lower, in sympathy with wheat.

Washington, D.C., April 8.—A winter wheat crop of 458,000,000 bushels—42 per cent below the bumper 787,000,000-bushel 1931 crop—was forecast to-day by the Agriculture Department on the basis of April 1 conditions.

To-day's Grain Markets

WINNIPEG

By Logan & Bryan
Winnipeg, April 8.—Wheat: After showing a little strength at the opening this morning, wheat gradually eased off and developed extreme weakness during the last hour of the session.

Further weakness in the stock market and some early reports that the thermometer was falling sharply at some Kansas points were the features that upset confidence on the buying side in Chicago, and with the trade and commission houses unloading prices in the Chicago market, broke about 3 cents in the new crop month.

Weathers in the United States, both steady and good, led to general liquidation here, and while the market did not show the extreme break of Chicago prices, declined nearly 2 cents. Outside of liquidation by locals and commission houses, there was some unloading or spreads, selling here against purchases in Chicago. The support was thin, but it was understood that a little export business was being worked on the scales here. The market was well into the daily bounces which brought in a certain amount of support, but the offerings were quite heavy until the extreme lows were reached.

There were no indications of export business overnight, but seaboard reported a few loads of Manitobas, but generally speaking, the foreign interest was disappointing.

Weather forced predicted cloudy and cool unsettled conditions on Saturday in the southwest.

The situation in the cash market was unchanged, there being a very poor demand for everything. Offerings were not pressing and all spreads were unchanged. Argentine wheat shipments for the week totalled 5,074,000 bushels, while Australia closed 935,000 bushels. Canadian exports in west Thursday were 201,000 vs 325,000 bushel year ago. S. Evans says wheat stocks in all positions 185,000 vs 181,000 bushel. Last year deliveries wheat at country points from April 1 to April 1, 229,000 bushels.

Winnipeg closed 1½ to 2½ lower. Coarse grains: Oats held fairly steady, barley somewhat weaker and rye more than followed break in wheat. Business light, but there was liquidation in barley and rye especially this morning.

Oats closed ½ to ¾ lower, barley ¾ to 1 lower, rye ½ to 2 lower, flax ½ to 1 lower.

Liverpool due 1½ to 2½ lower on Winnipeg.

SHIPPING, RAILWAY AND AVIATION NEWS

C. COAST IS PRAISED

New Yorkers Tell of Their Cruise Along Coast; Paid Visit to Victoria

British Columbia's fine cruising waters are lauded in an interesting article in the New York newspaper *Border Boating*, a New York yachting magazine. It tells the story of a cruise two New Yorkers in a small boat along this coast last summer. Victoria mentioned as being as many other places along the Coast.

In part the article says: "Winding around the pictureque Gulf Islands, bucking husky tides, we drank in more than two men's share of sun and scenery. Past Salt Spring Island, Ladysmith, where they mine sand under the sea, descending by a reef sunk on a dot of an island, Galiano Island, and into Nanaimo Harbor. Men, ladies too, you can't beat!

In another part Victoria is mentioned. It says: "We checked in at Nanaimo, on the east coast of Vancouver Island, again on the first trip. Made up there for sentimental reasons, but then there's another chapter. We embarked, down the beautiful Strait of Georgia, finally dropping hooks in the sedate little city of Victoria, on the southern tip of Vancouver Island, Victoria is the capital City of British Columbia, and is just a bit of Jerry old England removed to the North American Continent. Here bicycles are in vogue."

"All too soon we downed our last schooner of beer and pointed our ship to Roche Harbor, entry port for the United States."

HIPS ARE DUE FROM ENGLAND

Two ships are due here from the United Kingdom Sunday evening or Monday morning, according to schedules received here this morning.

They are the Donaldson freighter *Armenian* which has sailed from Los Angeles harbor direct for this port, one is from London, Liverpool and Manchester.

The *Diedrich* of the Holland-American Line is also expected. She is coming from Rotterdam and London and bringing local cargo.

The Furness motorliner Pacific Clipper was here for a few hours yesterday evening on her way from Seattle, via the Panama Canal, to California ports. She docked shortly after 5 o'clock and proceeded to Vancouver at 9 o'clock in the evening.

BORN AT SEA

San Francisco, April 8.—Returning from Hawaii, officers of the freighter *Manulani* said their ship arrived at the Hawaiian city with more freight than it had when it left San Francisco. The cargo included thirty-two live cows. When it arrived it had thirty-two cows and twelve calves. Members of the crew played milkmen and stored the surplus milk in the ship's refrigerators.

HAWKS STILL IN HOSPITAL

No Change in Condition of Flier Who Crashed; X-Ray Pictures Will Be Taken

Worcester, Mass., April 8.—"No change appeared this morning in the condition of Capt. Hawks," said Dr. George A. Maciver, superintendent of the city hospital, where the speed flier was taken yesterday after his crash.

He was flying over the North Stratton Airports in an attempted take-off for Boston. Dr. Maciver said the famous record holder had slept fitfully throughout the night and that his temperature this morning was normal.

X-ray pictures were to be taken to the extent of possible internal injuries or a fracture of the skull.

Maciver said no skull fracture was apparent.

He had communicated with the railway on the matter. Dr. Maciver said, and urged the management to retain as many employees as possible.

The plane crashed at 10:45 a.m.

"All too soon we downed our last schooner of beer and pointed our ship to Roche Harbor, entry port for the United States."

HOPE TO KEEP MEN AT WORK

C.N.R. and Shopmen Carrying on Negotiations Regarding Cut in Staff

Ottawa, April 8—Negotiations are still going forward between the Canadian National Railways and representatives of the railway shopmen, and it is hoped that they will result in more employees being retained than was originally contemplated. This was the effect of an answer given in the House of Commons yesterday by E. J. Mantion, Minister of Railways and Canals, to a question by J. S. Woodsorth, Winnipeg North Centre.

Mr. Woodsorth asked the minister if he had any further information to give the house in regard to the proposed discharge of large numbers of shopmen by the Canadian National.

The minister replied that the matter was now being discussed by the management of the railway with a committee of the employees. It was hoped that the negotiations would result in a larger number of men being kept on.

W. L. Mackenzie King, opposition leader, said he had received representations from the Canadian National and Prince Albert in regard to the discharge of employees. The representations were to the effect that if these employees were deprived of their work the danger existed of their becoming a public charge.

He had communicated with the railway on the matter. Dr. Mantion said, and urged the management to retain as many employees as possible.

GASOLINE DUTY IS DISCUSSED

Anti-dump Levy Subject of Questions at Commons Committee's Inquiry

Canadian Press
Ottawa, April 8.—Protection given Canadian gasoline companies by dumping duties instituted by the government was the subject of technical discussion by members of the banking and commerce committee of the Commons yesterday when it resumed its investigation of the prices of gasoline in Canada.

The assistant Dominion appraiser, Edward Richards, told the committee what factors had been taken into consideration in determining the dumping duties and was submitted to close cross-examination by Dr. Thomas Donnelly, Liberal, Willow Beach, Sack, and C. E. Bothwell, Liberal, Sunburst Current, Sask., the mover and seconder of the resolution requesting the investigation.

It was suggested by Mr. Bothwell that the National Revenue Department had followed a considerable extent the requests of the Canadian gasoline companies in determining dumping duties and had not taken into consideration the fact that the cost of refining from crude oil had been reduced.

The escaping of the dumping duties by gasoline companies of Canada whose parent companies in the United States was probed by Dr. Donnelly. It had been the practice, he declared, for the United States company to increase its price, from the otherwise depressed price, to that necessitated by the dumping duty cause, and to sell to its subsidiary in Canada, which could consequently reflect the price to the consumers and increase its business. The duty charge did not mean anything since the company was merely "paying it to itself."

Mr. Richards admitted there had been a few cases of that evasion, but declared the practice was not an extensive one.

It was intimated by the chairman, R. C. Mathews, Conservative, Toronto East Centre, that the committee would next meet Tuesday, April 12, when the Turner Valley project would be discussed.

Rheumatism Goes Swollen Joints Vanish

How to End Rheumatism in Less Than a Week

If you suffer from torturing rheumatic pains, sore muscles or stiff inflamed joints, it's because your system is full of the dangerous poisons that cause rheumatism and make thousands helpless. What you need is RU-MA, and need it right now. All druggists sell it with guarantee.

RU-MA removes the blood, stomach, kidneys, and liver, and drives the dangerous rheumatic poisons from the system through the natural channels of elimination—it eases pain the first day.

You must use an internal medicine to free the joints and muscles of cringing stiffness, soreness and torturing pain. That's why RU-MA succeeds while external remedies and pain deadening drugs give only temporary relief.

McFarlane and Vancouver Drug Stores say no matter what kind of rheumatism you have, or how long you have suffered, try RU-MA—it must completely end all rheumatic agony or you get your money back.

HOUSE DEBATES EMPIRE BUYING

Premier Optimistic Over Economic Conference at Ottawa in July

Resolution Invites Delegates to Pay Visit to British Columbia

After Premier Tolmie had spoken with considerable enthusiasm in favor of an empire buying policy the Legislature yesterday approved of a resolution in his name on the order papers expressing satisfaction that the Imperial Conference was being held in Ottawa this summer. A cordial invitation to the delegates to visit British Columbia before proceeding to Ottawa in July was coupled with the resolution.

Attorney-General Pooley seconded the motion, which was supported by T. D. Patullo, Leader of the Opposition; Hon. R. L. Maitland, K.C., Minister without portfolio; Dr. J. J. O'Brien, Liberal, Yale, and Capt. James Fitzsimmons, Conservative, Kaslo-Slocan.

Thomas Uphill, Labor, Fernie, doubted the sincerity of the conference. He feared it might be an attempt to hoodwink the public instead of facing the real problem of the world at the present time.

At M. Mansfield, C., Liberal, Omineca, after some time had been spent on the resolution, said he always thought it was better to bind the empire in bonds of love than bonds of steel, and suggest the Legislature get on with the business of British Columbia.

GREAT OPPORTUNITY

Premier Tolmie, in moving the resolution, thought the conference offered a wonderful opportunity to build up trade within the empire to the advantage of every member of the empire. A tremendous "buy British" sentiment had been created in the United Kingdom and the various Dominions had been pressing for definition of a real empire policy. The unbroken trade with foreign countries was draining away the wealth of the empire. Trade which was not developed into British channels.

Essential the empire could be made self-contained as was the United States empire to-day. The organization of empire into a unified vast business concern held out tremendous possibilities and was definitely headed somewhere.

"If the empire is worth while, and all will admit this and are proud of it," said the Premier, "let us do something to perpetuate it. Why not develop the opportunities within the empire first before running far afield in search of new markets?"

UP AND DOING

Attorney-General Pooley thought it was time the empire was up and doing. The Old Country had been the dumping ground of the world too long in a large measure to the detriment of the colonies and Dominions.

It was gratifying to see the Dominions taking the matter in hand. He told Hon. H. C. Wren, a suit of clothes made in Russia could be bought in England for \$2.50, after freight and duty paid. He questioned what the farners got for his wool, and the weaver and tailor for their work on the suit. It was high time, he claimed, walls were put up to protect the people of England from the cheap labor conditions which have prevailed in the country of origin.

A suit of clothes made in Russia would come out at three times the cost.

Mr. Patullo wished the conference to recommend a resolution of the present depression and unemployment period. A conference of the Dominions immediately afterwards to agree upon a bill of legislation throughout the country giving effect to the policy was recommended.

Colonel Spencer took occasion to advance his own view that the only solution was putting five people to do the work now done by four. The big commercial organizations not competing in foreign markets could be organized in the end without difficulty, he said, if the effort were made.

MORE POPULATION

He also expressed himself as convinced it was a mistake to assume the country had too much population. What was needed, he claimed, was more population to utilize its equipment and resources. Only Dr. J. J. Gillis, Yale, and Reginald Hayward, Victoria, spoke to the motion, since there will be a full debate on the issue when the report of the unemployment committee is tabled.

Several other resolutions moved by Liberal members asking for returns of information about public business were adopted without comment. One asking for a list of rentals paid for Liquor Board premises caused Attorney-General Pooley to say the rentals had been reduced. A. M. Mansfield said this was because the board had bought and built expensive premises, the interest on which would be greater than the former rents.

PETROLEUM BILL

Only one of the proposed modifications to the Petroleum and Natural Gas Bill was accepted by Hon. N. S. Loughheed, Minister of Lands, when the bill was reconsidered.

He changed the royalty from 12½ cents a barrel to a percentage basis, as suggested by T. D. Patullo, opposition leader, although Mr. Patullo said the amendment did not fully meet his point. The new royalty basis is to be from 5 to 12½ per cent of the value of the oil, but Mr. Patullo said no maximum should be fixed, as this debarred the Legislature from raising it in the public interest if at any time such a course became desirable.

The monasteries and Colonels Spencer said without a maximum capital might be derived from developing British Columbia oil fields.

The other limitations on prospectors or men of small means in the way and amount of money to be spent on development were not modified, and the high rentals remain in the bill, which is now ready for third reading.

Mr. Patullo distributed in Saanich during the first three months of this year cost \$13,759, the Saanich Council was yesterday evening informed.

The proportion payable by the municipalities was \$3,174. The two governments were responsible for \$10,584 of which \$4,755 had been received, and \$6,009 was outstanding.

The provincial government had made full settlement of all legal charges, accruing up to December 31 last, Saanich having this week received a cheque for \$23,750, on account of sums due from the Dominion Government.
